The Board Manual is a compilation of legal principles and provisions related to the laws and regulations, the Articles

perundang-undangan, Anggaran Dasar maupun peraturan Perusahaan yang mengatur mengenai tata kerja Dewan Komisaris.

*Board Manual* terakhir diperbarui pada 28 Desember 2021. Penyusunan *Board Manual* Dewan Komisaris disesuaikan dengan ketentuan dan peraturan perundang-undangan yang berlaku.

### **Board Manual bagi Dewan Komisaris**

Dalam rangka penerapan prinsip *Good Corporate Governance* dan untuk memenuhi kepentingan pemegang saham dan *stakeholder* lainnya, Direksi dan Dewan Komisaris membutuhkan suatu pedoman yang akan dijadikan acuan dalam pengurusan Perusahaan agar sesuai dengan tujuan serta kepatuhan terhadap ketentuan yang berlaku. Hubungan antar Dewan Komisaris dan Direksi dalam sistem tata hukum Indonesia merupakan hubungan yang berdasarkan prinsip *two tiers system*. Artinya terdapat pemisahan tugas dan kewajiban yang tegas bahwa Perusahaan dipimpin dan dikelola oleh Direksi, sedangkan Dewan Komisaris melakukan pengawasan dan pemberian nasihat terhadap tindakan yang dilakukan Direksi.

Keduanya mempunyai tanggung jawab untuk memelihara kesinambungan usaha perusahaan dalam jangka panjang. Oleh karena itu perlu adanya kejelasan sistem dan struktur menyangkut hubungan antar Organ Perusahaan dengan berpedoman pada prinsip-prinsip *Good Corporate Governance* (GCG). Fungsi, tugas dan hubungan kerja masing-masing Organ Perusahaan didefinisikan secara jelas dan dijalankan dengan konsisten.

*Board Manual* merupakan kesepakatan bersama Dewan Komisaris dengan Direksi PT Semen Baturaja Tbk, dalam menjalankan fungsi dan peran jabatannya sebagai pengemban amanat Perusahaan sesuai peraturan dan perundang-undangan yang berlaku. *Board Manual* merupakan salah satu perangkat GCG yang mengacu pada Anggaran Dasar serta dasar-dasar hukum yang berlaku.

Adapun tujuan penyusunan *Board Manual* adalah sebagai berikut:

1. Menjadi Pedoman umum bagi Dewan Komisaris dan Direksi dalam menjalankan fungsi dan peran jabatannya dalam organisasi PT Semen Baturaja Tbk.
2. Menjabarkan berbagai hal mengenai pelaksanaan, tugas, wewenang, tanggung jawab, hak dan kewajiban serta tata hubungan Direksi dengan Dewan Komisaris.
3. Menerapkan asas-asas *Good Corporate Governance* (GCG) yakni *Transparency, Accountability, Responsibility, Independency* dan *Fairness*.

*Board Manual* Dewan Komisaris memuat:

1. Komposisi Dewan Komisaris.
2. Fungsi Dewan Komisaris.
3. Persyaratan Dewan Komisaris.
4. Keanggotaan Dewan Komisaris.
5. Lowong Jabatan Dewan Komisaris.

## ASSESSMENT OF THE BOARD OF COMMISSIONERS AND THE BOARD OF DIRECTORS

The evaluation of the Board of Commissioners and Board of Directors is conducted using assessment parameters that refer to the Decree of the Secretary of the Ministry of SOE No. SK-16/S.MBU/2012, dated June 06, 2012. ### Performance Assessment of the Board of Commissioners

The annual performance evaluation of the Board of Commissioners is conducted by the Shareholders during the General Meeting of Shareholders. The assessment is based on the duties and obligations outlined in the relevant laws and regulations, the Company's Articles of Association, and the Shareholders' mandate. The evaluation results are reflected in the GMS Decision, which approves and ratifies the Financial Statements, including the Board of Commissioners' report on the Company's oversight duties for the fiscal year. The performance appraisal of the Board of Commissioners is conducted regularly once a year.

### Performance Assessment of the Board of Commissioners based on KPI

The Board of Commissioners' Performance Assessment is conducted based on the Key Performance Indicators (KPI) which measures the successful implementation of their supervisory duties and providing advice to the Board of Directors in accordance with the Articles of Association and applicable laws and regulations.

The Board of Commissioners' KPI is derived from the criteria for their Performance Assessment, which is stated in their Work Plan and Budget. The KPI comprises of three aspects:

1. Supervision and Direction Aspect
  - a. Review/analysis of company performance.
  - b. Board of Commissioners Meetings (number of meetings and meeting attendance rate).
  - c. Monitoring/evaluation of production units/investment projects.
  - d. Follow-up monitoring of the Auditor's findings.
2. Reporting Aspect
  - a. Prepare and submit an Annual Work Plan and Budget.
  - b. Submit reports on the implementation of supervisory duties.
3. Other aspects (competency improvement)

The criteria used for performance assessment of the Board of Commissioners for the year 2022 will be based on the achievements of the Board's work program in line with the targets outlined in the 2022 Annual Work Plan of the Board of Commissioners.

### Performance Assessment of the Board of Commissioners Based on GCG Assessment

The decree specifies the indicators and parameters for assessing and evaluating the implementation of good corporate governance in state-owned enterprises, particularly in terms of the aspects of the Board of Commissioners.

### Procedures and Parties Conducting the Assessment

The General Meeting of Shareholders (GMS) is responsible for evaluating the performance of the Board of Commissioners, who in turn are accountable for their achievements during the 2022 period. This is done by submitting a report on the implementation of their supervisory duties in the Company's annual report, which will be presented to shareholders at the GMS scheduled for 2023.

Furthermore, the performance assessment of the Board of Commissioners is conducted annually, and for the 2022 assessment, an independent consultant from PT Citra Solusi Manajemen will be employed to carry out the evaluation.

### Alasan Belum/Tidak Diterapkannya Rekomendasi

Beberapa alasan rekomendasi hasil assessment GCG tahun 2021 yang belum selesai ditindaklanjuti selama tahun 2022 adalah sebagai berikut:

1. Risalah RUPS belum memuat alasan pemberhentian Anggota Direksi dan Anggota Dewan Komisaris dikarenakan tidak dinyatakannya alasan pemberhentian oleh Pemegang Saham.
2. Komite Audit dan Komite Manajemen Risiko belum menyusun perbandingan realisasi kegiatan dengan program kerja tahunan komite dalam Laporan Komite.

### Recommendations on Assessment Results

Here are the recommendations based on the results of the Board of Commissioners' aspect assessment:

1. The Audit Committee should provide a report that includes a comparison of their actual activities with the annual work program submitted to the Board of Commissioners, on a quarterly and annual basis. This will serve as a form of accountability for the proper implementation of committee duties as specified in the Minister of SOE Regulation No. PER-12/MBU/2012, dated August 24, 2012, which outlines the supporting organs for the Board of Commissioners/Supervisory Board of State-Owned Business Entities.
2. The Risk Management Committee should prepare and submit a report that compares their actual activities with the annual work programs submitted to the Board of Commissioners, on an annual basis. This report will serve as a means of accountability for carrying out committee duties, as stated in the Minister of SOE Regulation No. PER-12/MBU/2012, dated August 24, 2012, which outlines the supporting organs of the Board of Commissioners/Supervisory Board of State-Owned Enterprises.

### Reasons Recommendations Have Not Yet/ Not Implemented

Several recommendations from the 2021 GCG assessment results were not implemented during 2022 due to the following reasons.

1. The GMS minutes did not provide reasons for the dismissal of the Board of Directors and Board of Commissioners' members, as the Shareholders did not disclose the reasons for the dismissal.
2. The Audit Committee and Risk Management Committee failed to include a comparison of activity realization with the committee's annual work program in their respective reports.

## Penilaian Kinerja Direksi

Hasil kinerja Direksi dilaporkan oleh Dewan Komisaris kepada RUPS di dalam Laporan Tugas Pengawasan Dewan Komisaris.

The Board of Commissioners reports the Board of Directors' performance results to the GMS in the Board of Commissioners' Supervisory Task Report.

## Independensi Anggota Komite Audit

Keanggotaan Komite Audit bersifat Independen sehingga Anggota Komite diharapkan mampu memberikan pendapat profesional secara bebas sesuai dengan etika profesionalnya tanpa memihak kepada siapa pun karena tidak adanya benturan kepentingan.

Hal tersebut juga berlaku untuk Ketua Komite Audit yang dijabat oleh Dewan Komisaris Independen atau anggota Dewan Komisaris yang dapat bertindak independen. Independensi komite tidak dapat dipisahkan moralitas yang melandasi integritasnya. Hal ini perlu menjadi perhatian penting karena Komite Audit merupakan pihak yang menjembatani antara eksternal auditor dan Perusahaan Komite Audit juga menjadi penghubung antara fungsi pengawasan Dewan Komisaris dengan internal auditor.

## Independency of Members of the Audit Committee

The membership of the Audit Committee is expected to maintain independence, allowing members to provide professional opinions in accordance with ethical principles and without bias towards any party, ensuring no conflicts of interest exist.

This requirement also applies to the Chairman of the Audit Committee, who must be an independent Board of Commissioners member, or at the very least, act independently. The integrity of the committee is built upon the moral foundation of its members. This aspect is of critical importance as the Audit Committee is responsible for bridging communication between the external auditor and the Company. Moreover, it serves as a point of contact between the Board of Commissioners' supervisory function and the internal auditor.

Seluruh anggota Komite Audit tidak memiliki hubungan afiliasi dengan manajemen Perusahaan termasuk menjabat salah satu jabatan dalam struktur organisasi Perusahaan maupun anak perusahaan.

Kualifikasi independensi dari anggota Komite Audit harus memenuhi kriteria sebagai berikut:

It is required that all members of the Audit Committee maintain a non-affiliated relationship with the Company's management, which includes not holding any position within the Company or its subsidiaries' organizational structure.

The members of the Audit Committee must fulfill certain criteria to maintain their independence, which are as follows:

locations throughout the sales area, optimize distributor warehouses, and synchronize demand supply planning through monthly tactical demand and supply meetings. Additionally, the company should carry out daily planning and evaluation using the scheduling & plotting method of fleets, by involving Distributors and Forwarders. It should also add to the fleet through collaboration with other vendors, both through the Operational Cooperation (KSO) route and as accompanying forwarders to deal with increased orders during high season.

2. Risk of uncollectible trade receivables.  
To address this issue, we will ensure that all receivables are guaranteed according to the standard operating procedure. Additionally, we will update the SOP for Recording and Collecting Receivables, with a focus on improving rules related to grace periods, imposing strict sanctions, and rescheduling rules. Furthermore, we will collaborate with the State Attorney's Office to collect accounts receivable effectively.
3. Risk of insufficient availability of raw materials for long-term production (> 10 years).  
To address this risk, the company plans to expedite the completion of technical and environmental permit documents for Mine 3 (T3), accelerate the upgrading of the T3 Mining Business Permit (IUP) status, develop infrastructure and supporting facilities for the T3 mine, and coordinate with relevant divisions and agencies.
4. Risk of disruption to the supply of fuel to the factory.  
To mitigate this risk, the company plans to identify alternative vendors who can supply similar goods at competitive prices, conduct analysis and trials on the use of low-calorie coal (GAR 4200-4500), and explore alternative fuels as substitutes for coal.
5. Risk of unexpected plant shutdown.  
To mitigate this risk, the company plans to coordinate and report on inspection and monthly equipment condition checks, maximize available storage facilities, improve equipment condition monitoring, prioritize the purchase of security parts and allocate the necessary budget, engage in intense coordination regarding stock and material quality, and share system knowledge and operational and preventive equipment.
6. Risk of inadequate availability of spare parts when needed.

7. Risk of inadequate availability of auxiliary raw materials.  
To address this risk, the company plans to maintain a minimum stock of supporting raw materials, ensure the availability of supporting raw materials to meet usage needs for one week for vendor locations still in the South Sumatra region and one month for vendor locations outside the Sumbagsel area, procure alternative raw

Dalam penerapannya, *monitoring* risiko di tahun 2022 disusun dan dilakukan secara komprehensif pada proses bisnis di setiap unit kerja, dengan melalui tahapan proses pemantauan risiko yang diikuti dengan proses komunikasi dan koordinasi secara berkesinambungan untuk memastikan efektivitas pelaksanaan atas mitigasi risiko (tindak lanjut) yang telah dilakukan dengan baik dan sesuai dengan rencana yang telah ditetapkan. Hal ini diharapkan dapat meminimalisir dan mengendalikan potensi risiko Perusahaan.

*Monitoring* Realisasi Mitigasi Risiko yang dilaksanakan Perusahaan dilakukan dalam 4 (empat) periode, yaitu:

1. Periode Triwulan 1 dilakukan dari bulan Januari sampai dengan Maret 2022 yang dilaporkan pada bulan April 2022.
2. Periode Triwulan 2 dilakukan dari bulan April sampai dengan Juni 2022 yang dilaporkan pada bulan Juli 2022.
3. Periode Triwulan 3 dilakukan dari bulan Juli sampai dengan September 2022 yang dilaporkan pada bulan Oktober 2022.
4. Periode Triwulan 4 dilakukan dari bulan Oktober sampai dengan Desember 2022 yang dilaporkan pada bulan Januari 2023.

Selanjutnya, Laporan *Monitoring* Realisasi Mitigasi Risiko tahun 2022 akan dilaporkan kepada Dewan Komisaris setelah mendapat persetujuan dari Direksi.

Pada saat dilakukan penyusunan, Perusahaan telah mempunyai kriteria mengenai batas tingkat risiko yang dapat diterima. Untuk itu, dalam melakukan evaluasi risiko, risiko yang telah dianalisis/diukur peringkatnya berdasarkan tingkat atau nilai risiko digunakan untuk menentukan prioritas pengelolaannya.

Kemudian, risiko yang teridentifikasi tersebut akan dikelola Perusahaan dengan mempertimbangkan rencana perlakuan yang sesuai. Hal tersebut diharapkan dapat menurunkan risiko Perusahaan dibandingkan dengan sebelum perlakuan tersebut dilakukan.

Dalam hal ini, hasil penyusunan terhadap risiko yang teridentifikasi menunjukkan tingkat risiko setelah memperhatikan pengendalian yang ada masih relatif tinggi. Oleh karena itu, Perusahaan memerlukan peningkatan pengendalian atau alternatif perlakuan risiko yang lain untuk mengurangi risiko sampai pada tingkat yang dapat diterima.

materials to replace silica sand for which a mining permit has not yet been obtained at the Baturaja Plant (PBR), utilize storage at PBR 1 that has not yet operated as a buffer during the rainy season (especially pozzolan), take advantage of the availability of ready-to-transport barges to maximize revenue at the Panjang Plant (PPJ), and store gypsum in closed storage while LIF A and iron sand are placed in open storage.

In 2022, the implementation of risk monitoring will be carried out in a comprehensive manner throughout the Company's business processes, involving each work unit. The risk monitoring process will be executed in stages, and continuous communication and coordination processes will be established to ensure the effectiveness of the risk mitigation implementation, which will be carried out in accordance with the pre-established plan. The ultimate goal is to minimize and control potential risks faced by the Company.

The Company monitors the realization of risk mitigation in four distinct periods. These periods are as follows:

1. The first quarter period spans from January to March 2022 and is reported in April 2022.
2. The second quarter period spans from April to June 2022 and is reported in July 2022.
3. The third quarter period spans from July to September 2022 and is reported in October 2022.
4. The fourth quarter period spans from October to December 2022 and is reported in January 2023.

In addition, the report on the realization of risk mitigation for 2022 will be presented to the Board of Commissioners once it has been approved by the Board of Directors.

During the preparation stage, the Company has established specific criteria for acceptable risk limits. As a result, in conducting a risk evaluation, the identified risks are ranked based on their level or value to determine management priorities.

Next, the Company will manage the identified risks by implementing an appropriate treatment plan, with the aim of reducing risks compared to the pre-treatment stage.

However, the results of the risk evaluation indicate that, despite existing controls, the level of risk is still relatively high. Therefore, the Company requires increased control measures or alternative risk treatments to reduce the risk to an acceptable level.

## Laporan Auditor Independen/ Independent Auditor's Report

The Shareholders, Board of Commissioners, and Directors

PT Semen Baturaja Tbk

Laporan Audit atas Laporan Keuangan      Report on the audit of the Consolidated  
Konsolidasian      Financial Statements

### Opini

Kami telah mengaudit laporan keuangan konsolidasian PT Semen Baturaja Tbk dan entitas anaknya ("Grup") terlampir yang terdiri dari laporan posisi keuangan konsolidasian tanggal 31 Desember 2022, serta laporan laba rugi dan penghasilan komprehensif lain konsolidasian, laporan perubahan ekuitas, dan laporan arus kas konsolidasian untuk tahun yang berakhir pada tanggal tersebut, serta catatan atas laporan keuangan konsolidasian, termasuk ikhtisar kebijakan akuntansi signifikan.

Menurut opini kami, laporan keuangan konsolidasian terlampir menyajikan secara wajar, dalam semua hal yang material, posisi keuangan konsolidasian Grup tanggal 31 Desember 2022, serta kinerja keuangan dan arus kas konsolidasian nya untuk tahun yang berakhir pada tanggal tersebut, sesuai dengan Standar Akuntansi Keuangan di Indonesia.

### Basis Opini

Kami melaksanakan audit kami berdasarkan Standar Audit yang ditetapkan oleh Institut Akuntan Publik Indonesia. Tanggung jawab kami menurut standar tersebut diuraikan lebih lanjut dalam paragraf Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan Konsolidasian pada laporan kami. Kami independen terhadap Grup berdasarkan ketentuan etika yang relevan dalam audit kami atas laporan keuangan konsolidasian di Indonesia, dan

### Opinion

We have audited the accompanying consolidated financial statements of PT Semen Baturaja Tbk and its subsidiary (the "Group"), which comprise the consolidated statement of financial position as of December 31, 2022, and the consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2022, and their consolidated financial performance and their cash flows for the year ended, in accordance with Indonesian Financial Accounting Standards.

### Basis for Opinion

We conducted our audit in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements paragraph of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the consolidated

THE POWER OF BEING UNDERSTOOD  
AUDIT | TAX | CONSULTING

kami telah memenuhi tanggung jawab etika lainnya berdasarkan ketentuan tersebut. Kami yakin bahwa bukti audit yang telah kami peroleh adalah cukup dan tepat untuk menyediakan suatu basis bagi opini audit kami.

### Hal Audit Utama

Hal audit utama adalah hal-hal yang, menurut pertimbangan profesional kami, merupakan hal yang paling signifikan dalam audit kami atas laporan keuangan konsolidasian periode kini. Hal-hal tersebut disampaikan dalam konteks audit kami atas laporan keuangan konsolidasian secara keseluruhan, dan dalam merumuskan opini kami atas laporan keuangan konsolidasian terkait, kami tidak menyatakan suatu opini terpisah atas hal audit utama tersebut.

### Estimasi Penurunan Nilai Piutang Usaha

Estimasi penyisihan penurunan nilai piutang didasarkan pada asumsi *default* dan tingkat kerugian kredit ekspektasian. Asumsi dan pemilihan input untuk perhitungan penurunan nilai didasarkan pada pengalaman historis, kondisi pasar yang ada serta estimasi perkiraan ke depan Grup. Ketika arus kas masa depan aktual lebih kecil dari yang diharapkan, kerugian penurunan nilai yang material dapat timbul. Karena asumsi dan input utama yang digunakan untuk mengukur kerugian kredit ekspektasian atas piutang usaha melibatkan pertimbangan dan ketidakpastian yang signifikan, kami mempertimbangkan estimasi penurunan nilai piutang usaha sebagai salah satu hal audit utama.

### Bagaimana kami merespons Hal Audit Utama

- Kami memperoleh pemahaman atas prosedur internal kontrol terkait penyisihan atas penurunan nilai piutang usaha yang dilakukan oleh manajemen;
- Kami mengevaluasi kewajaran penyisihan kerugian penurunan nilai dengan menguji umur piutang usaha dan dengan menghitung potensi risiko piutang usaha yang telah jatuh tempo pada tanggal neraca;
- Berdasarkan uji petik, kami menguji pemulihan piutang usaha dengan memeriksa penerimaan kas setelah tanggal neraca;
- Untuk estimasi penurunan nilai piutang, kami mengevaluasi kecukupan penyisihan penurunan nilai dari manajemen berdasarkan pengalaman wanprestasi masa lalu pelanggan, posisi keuangan periode ini, jaminan yang dijaminkan, kondisi pasar yang ada serta estimasi perkiraan ke depan.

*financial statements in Indonesia, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.*

### Key Audit Matters

*Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.*

### Estimated Impairment of Trade Receivables

*The estimated provision for impairment of trade receivables is based on the assumptions of defaults and expected loss rates. The assumptions and selection of inputs for impairment calculation are based on the Group's historical experience, existing market conditions as well as forward looking estimates. When the actual future cash flows are less than expected, a material impairment loss may arise. Because key assumptions and inputs used for measuring expected credit losses on trade receivables involve significant judgments and uncertainties, we considered the estimated impairment of trade receivables as one of the key audit matters.*

### How our audit addressed the Key Audit Matter

- *We obtained an understanding of the internal control procedures with respect to management's allowance for impairment loss of trade receivables;*
- *We evaluated the reasonableness of allowance for impairment loss by testing the aging of trade receivables and by quantifying potential risk of trade receivables that were overdue at the balance sheet date;*
- *On a sample basis, we tested the recoverability of trade receivables by vouching cash receipts after the balance sheet date;*
- *For the estimated impairment of trade receivables, we evaluated the adequacy of management's provision for impairment based on customers' past default experience, current financial position, any collateral pledged, existing market conditions as well as forward looking estimates.*

### Penekanan Suatu Hal

Kami membawa perhatian ke Catatan 41 atas laporan keuangan konsolidasian terlampir yang menyajikan kembali laporan keuangan konsolidasian untuk tahun yang berakhir pada 31 Desember 2021 yang telah diterbitkan pada tanggal 15 Februari 2021 sesuai dengan PSAK 25. Penyesuaian tersebut berdampak pada saldo awal periode penyajian 1 Januari 2021.

### Hal lain

Audit kami atas laporan keuangan konsolidasian PT Semen Baturaja Tbk dan entitas anaknya tanggal 31 Desember 2022 terlampir, dilaksanakan dengan tujuan untuk merumuskan opini atas laporan keuangan konsolidasian secara keseluruhan. Informasi keuangan PT Semen Baturaja Tbk (entitas induk) terlampir, yang terdiri dari laporan posisi keuangan tanggal 31 Desember 2022, serta laporan laba rugi dan penghasilan komprehensif lain, laporan perubahan ekuitas, dan laporan arus kas untuk tahun yang berakhir pada tanggal tersebut (secara kolektif disebut sebagai "Informasi Keuangan Entitas Induk"), yang disajikan sebagai informasi tambahan terhadap laporan keuangan konsolidasian terlampir, disajikan untuk tujuan analisis tambahan dan bukan merupakan bagian dari laporan keuangan konsolidasian terlampir yang diharuskan menurut Standar Akuntansi Keuangan di Indonesia. Informasi Keuangan Entitas Induk merupakan tanggung jawab manajemen serta dihasilkan dari dan berkaitan secara langsung dengan catatan akuntansi dan catatan lainnya yang mendasarinya yang digunakan untuk menyusun laporan keuangan konsolidasian terlampir. Informasi Keuangan Entitas Induk telah menjadi objek prosedur audit yang diterapkan dalam audit atas laporan keuangan konsolidasian terlampir berdasarkan Standar Audit yang ditetapkan oleh Institut Akuntan Publik Indonesia. Menurut opini kami, Informasi Keuangan Entitas Induk disajikan secara wajar, dalam semua hal yang material, berkaitan dengan laporan keuangan konsolidasian terlampir secara keseluruhan.

### Tanggung Jawab Manajemen dan Pihak yang Bertanggung Jawab atas Tata Kelola terhadap Laporan Keuangan Konsolidasian

Manajemen bertanggung jawab atas penyusunan dan penyajian wajar laporan keuangan konsolidasian ini sesuai dengan Standar Akuntansi Keuangan di Indonesia, dan atas pengendalian internal yang dianggap perlu oleh manajemen untuk memungkinkan penyusunan laporan keuangan konsolidasian yang bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan.

### Emphasis of matter

*We draw attention to Note 41 to the accompanying consolidated financial statements which restated the consolidated financial statements for the year ended December 31, 2021 which was issued on February 15, 2021 in accordance with PSAK 25. The adjustment affected the beginning balance of the earliest period presented January 1, 2021.*

### Other matter

*Our audit of the accompanying consolidated financial statements of PT Semen Baturaja Tbk and its subsidiary as of December 31, 2022, was performed for the purpose of forming an opinion on such consolidated financial statements taken as a whole. The accompanying financial information of PT Semen Baturaja Tbk (parent entity), which comprises the statement of financial position as of December 31, 2022 and the statement of profit or loss and other comprehensive income, statements of changes in equity, and statement of cash flows for the year ended (collectively referred to as the "Parent Entity Financial Information"), which is presented as a supplementary information to the accompanying consolidated financial statements, is presented for the purposes of additional analysis and is not a required part of the accompanying consolidated financial statements under Indonesian Financial Accounting Standards. The Parent Entity Financial Information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the accompanying consolidated financial statements. The Parent Entity Financial Information has been subjected to the auditing procedures applied in the audit of the accompanying consolidated financial statements in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants. In our opinion, the Parent Entity Financial Information is fairly stated, in all material respects, in relation to the accompanying consolidated financial statements taken as a whole.*

### Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

*Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.*

Dalam penyusunan laporan keuangan konsolidasian, manajemen bertanggung jawab untuk menilai kemampuan Grup dalam mempertahankan kelangsungan usahanya, mengungkapkan, sesuai dengan kondisinya, hal-hal yang berkaitan dengan kelangsungan usaha, dan menggunakan basis akuntansi kelangsungan usaha, kecuali manajemen memiliki intensi untuk melikuidasi Grup atau menghentikan operasi, atau tidak memiliki alternatif yang realistis selain melaksanakannya.

Pihak yang bertanggung jawab atas tata Kelola bertanggung jawab untuk mengawasi proses pelaporan keuangan Grup.

## **Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan Konsolidasian**

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan konsolidasian secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun secara agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan konsolidasian tersebut.

Sebagai bagian dari suatu audit berdasarkan Standar Audit, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan konsolidasian, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian pengendalian internal.

*In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.*

*Those charged with governance are responsible for overseeing the Group's financial reporting process.*

## **Auditors' Responsibilities for the Audit of the Consolidated Financial Statements**

*Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.*

*As part of an audit in accordance with Standards on Auditing, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:*

- *Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.*

- Memeroleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Grup.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.
- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Grup untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor kami ke pengungkapan terkait dalam laporan keuangan konsolidasian atau, jika pengungkapan tersebut tidak memadai, harus menentukan apakah perlu untuk memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Grup tidak dapat mempertahankan kelangsungan usaha.
- Mengevaluasi penyajian, struktur, dan isi laporan keuangan konsolidasian secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan konsolidasian mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.
- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.*
- *Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*
- *Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.*
- *Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.*

Kami mengomunikasikan kepada pihak yang bertanggung jawab atas tata kelola mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit, serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang teridentifikasi oleh kami selama audit.

Kami juga memberikan suatu pernyataan kepada pihak yang bertanggung jawab atas tata kelola bahwa kami telah mematuhi ketentuan etika yang relevan mengenai independensi, dan mengomunikasikan seluruh hubungan, serta hal-hal lain yang dianggap secara wajar berpengaruh terhadap independensi kami, dan, jika relevan, pengamanan terkait.

*We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.*

*We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.*

Dari hal-hal yang dikomunikasikan kepada pihak yang bertanggung jawab atas tata kelola, kami menentukan hal-hal tersebut yang paling signifikan dalam audit atas laporan keuangan konsolidasian periode kini dan oleh karenanya menjadi hal audit utama. Kami menguraikan hal audit utama dalam laporan auditor kami, kecuali peraturan perundang-undangan melarang pengungkapan publik tentang hal tersebut atau ketika, dalam kondisi yang sangat jarang terjadi, kami menentukan bahwa suatu hal tidak boleh dikomunikasikan dalam laporan kami karena konsekuensi merugikan dari mengomunikasikan hal tersebut akan diekspektasikan secara wajar melebihi manfaat kepentingan publik atas komunikasi tersebut.

*From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.*

The consolidated financial statements have been prepared and presented in accordance with Indonesian Financial Accounting Standards which include the Statement of Financial Accounting Standards (PSAK) and Interpretation of Financial Accounting Standards (ISAK) issued by the Financial Accounting Standard Board - Indonesian Institute of Accountant (DSAK - IAI), and Decree of Chairman of Bapepam-LK No. KEP-347/BL.2012 dated June 25, 2012, regarding presentation and disclosure of financial statements of issuers or public companies (Regulation VIII.G.7).

**b. Dasar Pengukuran dan Penyusunan Laporan Keuangan Konsolidasian**

Laporan keuangan konsolidasian disusun dan disajikan berdasarkan asumsi kelangsungan usaha serta atas dasar akrual, kecuali laporan arus kas konsolidasian. Dasar pengukuran dalam penyusunan laporan keuangan konsolidasian ini menggunakan konsep biaya perolehan, kecuali untuk beberapa akun tertentu yang pengukurannya didasarkan pada nilai lain sebagaimana dijelaskan dalam tiap-tiap akun yang bersangkutan yang dimaksud dengan biaya perolehan adalah jumlah kas atau setara kas yang dibayarkan atau nilai wajar dari imbalan lain yang diserahkan untuk memperoleh suatu aset pada saat perolehan atau konstruksi atau, jika dapat diterapkan, jumlah yang diatribusikan pada aset ketika pertama kali diakui sesuai dengan persyaratan tertentu dalam Pernyataan Standar Akuntansi Keuangan (PSAK).

Laporan arus kas konsolidasian disajikan dengan metode langsung (*direct method*) dan arus kas dikelompokkan ke dalam aktivitas operasi, investasi dan pendanaan.

**d. Prinsip Prinsip Konsolidasian**

Entitas anak merupakan semua entitas (termasuk entitas bertujuan khusus), dimana Grup memiliki pengendalian. Grup mengendalikan suatu entitas ketika Grup memiliki hak atas imbal hasil variabel dari keterlibatannya dengan suatu entitas dan memiliki kemampuan untuk mempengaruhi imbal hasil tersebut melalui kekuasaannya atas entitas tersebut.

Entitas anak dikonsolidasi sejak tanggal pengendalian beralih kepada Grup dan tidak lagi dikonsolidasi sejak tanggal hilangnya pengendalian.

Saldo, transaksi, penghasilan dan beban intrakelompok usaha dieliminasi. Keuntungan dan kerugian hasil dari transaksi intrakelompok usaha yang diakui dalam aset juga dieliminasi. Kebijakan akuntansi entitas anak telah diubah seperlunya untuk memastikan konsistensi penerapan kebijakan oleh Grup.

Grup mengatribusikan laba rugi dan setiap komponen dari penghasilan komprehensif lain kepada pemilik entitas induk dan kepentingan nonpengendali meskipun hal tersebut mengakibatkan kepentingan nonpengendali memiliki saldo defisit. Grup menyajikan kepentingan nonpengendali di ekuitas dalam laporan posisi keuangan konsolidasian, terpisah dari ekuitas pemilik entitas induk.

Transaksi dengan kepentingan nonpengendali yang tidak mengakibatkan hilangnya pengendalian merupakan transaksi ekuitas. Selisih antara nilai wajar imbalan yang dibayar dan bagian yang diakuisisi atas nilai tercatat aset neto entitas anak dicatat pada ekuitas. Keuntungan atau kerugian pelepasan kepentingan nonpengendali juga dicatat pada ekuitas.

Jika Grup kehilangan pengendalian, maka Grup:

- a) Menghentikan pengakuan atas aset (termasuk *goodwill*) dan liabilitas entitas anak pada nilai tercatatnya ketika pengendalian tersebut hilang;

**d. Principles of Consolidation**

*Subsidiaries are all entities (including special purpose entities), over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.*

*Subsidiaries are consolidated from the date on which control is transferred to the Group. They are de consolidated from the date when that control ceases.*

*Intragroup balances, transactions, income and expenses are eliminated. Profits and losses resulting from intragroup transactions that are recognised in assets are also eliminated. The accounting policies of subsidiaries have been amended where necessary to ensure consistency with the policies adopted by the Group.*

*The Group attributed the profit or loss and each component of other comprehensive income to the owners of the parent and non-controlling interest even though this results in the non-controlling interests having a deficit balance. The Group presents non-controlling interest in equity in the consolidated statement of financial position, separately from the equity owners of the parent.*

*Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions. The difference between the fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiaries is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.*

*If the Group loses control, the Group:*

- a) *Derecognizes the assets (including goodwill) and liabilities of the subsidiary at their carrying amounts at the date when control is lost;*

**g. Instrumen keuangan**

**Pengakuan dan Pengukuran Awal**

Grup mengakui aset keuangan atau liabilitas keuangan dalam laporan posisi keuangan konsolidasian, jika dan hanya jika, Grup menjadi salah satu pihak dalam ketentuan pada kontrak instrumen tersebut. Pada saat pengakuan awal aset keuangan atau liabilitas keuangan, Grup mengukur aset keuangan dan liabilitas keuangan pada nilai wajarnya. Dalam hal aset keuangan atau liabilitas keuangan tidak diukur pada nilai wajar melalui laba rugi, nilai wajar tersebut ditambah atau dikurang dengan biaya transaksi yang dapat diatribusikan secara langsung dengan perolehan atau penerbitan aset keuangan atau liabilitas keuangan tersebut. Biaya transaksi yang dikeluarkan sehubungan dengan perolehan aset keuangan dan penerbitan liabilitas keuangan yang diklasifikasikan pada nilai wajar melalui laba rugi dibebankan segera.

Nilai wajar instrumen keuangan pada pengakuan awal biasanya sama dengan harga transaksi (yaitu nilai wajar imbalan yang diberikan atau diterima). Jika nilai wajar instrumen keuangan pada saat pengakuan awal berbeda dari harga transaksinya, Grup mengakui perbedaan antara nilai wajar pada saat pengakuan awal dan harga transaksi sebagai keuntungan atau kerugian.

**Pengukuran Selanjutnya Aset Keuangan**

Grup mengklasifikasikan aset keuangan pada: aset keuangan yang diukur pada biaya perolehan diamortisasi, aset keuangan yang diukur pada nilai wajar melalui penghasilan komprehensif lain dan aset keuangan yang diukur pada nilai wajar melalui laba rugi. Manajemen menentukan klasifikasi aset keuangan pada saat awal pengakuan.

Government related entity can be an entity which controlled or significantly influenced by the Ministry of Finance or Local Government that representing as the shareholders of the entity or an entity controlled by the Government of Republic of Indonesia, represented by the SOE's Ministry as a shareholder's representative.

**g. Financial instruments**

**Initial Recognition and Measurement**

The Group recognize a financial assets or a financial liabilities in the consolidated statement of financial position when, and only when, it becomes a party to the contractual provisions of the instrument. At initial recognition, the Group measure all financial assets and financial liabilities at its fair value. In the case of a financial asset or financial liability not at fair value through profit or loss, fair value plus or minus with the transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs incurred on acquisition of a financial asset and issue of a financial liability classified at fair value through profit or loss are expensed immediately.

The fair value of a financial instrument on initial recognition is usually the same as the transaction price (ie the fair value of the consideration given or received). If the fair value of a financial instrument at initial recognition differs from the transaction price, the Group recognizes the difference between the fair value at initial recognition and the transaction price as a gain or loss.

**Subsequent Measurement of Financial Assets**

The Group classified financial assets are measured at: financial assets measured at amortised cost, financial assets measured at fair value through other comprehensive income (FVTOCI) and financial assets measured at fair value through profit or loss (FVTPL). Management determines the classification of financial assets at initial recognition.

Aset keuangan diklasifikasikan menjadi kategori tersebut di atas dengan menggunakan dua dasar yaitu: model bisnis Grup dalam mengelola aset keuangan dan karakteristik arus kas kontraktual dari aset keuangan.

(i) Aset Keuangan yang Diukur Pada Biaya Perolehan Diamortisasi

Aset keuangan diukur pada biaya perolehan diamortisasi jika kedua kondisi berikut terpenuhi:

1. Aset keuangan dikelola dalam model bisnis yang bertujuan untuk memiliki aset keuangan dalam rangka mendapatkan arus kas kontraktual; dan
2. Persyaratan kontraktual dari aset keuangan menghasilkan arus kas pada tanggal tertentu yang semata dari pembayaran pokok dan bunga dari jumlah pokok terutang.

Aset keuangan ini diukur pada jumlah yang diakui pada awal pengakuan dikurangi dengan pembayaran pokok, kemudian dikurangi atau ditambah dengan jumlah amortisasi kumulatif atas perbedaan jumlah pengakuan awal dengan jumlah pada saat jatuh tempo, dan penurunan nilainya.

Pendapatan bunga dihitung dengan metode menggunakan suku bunga efektif dan diakui di laba rugi. Perubahan pada nilai wajar diakui di laba rugi ketika aset dihentikan atau direklasifikasi.

Aset keuangan yang diklasifikasikan menjadi aset keuangan yang diukur pada biaya perolehan diamortisasi dapat dijual ketika terdapat peningkatan risiko kredit. Penghentian untuk alasan lain diperbolehkan namun jumlah penjualan tersebut harus tidak signifikan jumlahnya atau tidak sering.

(ii) Aset Keuangan yang Diukur Pada Nilai Wajar Melalui Penghasilan Komprehensif Lain (FVTOCI)

Aset keuangan diukur pada nilai wajar melalui penghasilan komprehensif lain jika kedua kondisi berikut terpenuhi:

1. Aset keuangan dikelola dalam model bisnis yang tujuannya akan terpenuhi dengan mendapatkan arus kas kontraktual dan menjual aset keuangan; dan

*Financial assets are classified into these categories based on both: the Group's business model for managing the financial assets and the contractual cash flow characteristics of the financial asset.*

(i) Financial Assets Measured at Amortised Cost

*A financial asset shall be measured at amortised cost if both of the following conditions are met:*

1. *The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and*
2. *The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.*

*The financial asset is measured at the amount recognized at initial recognition minus principal repayments, plus or minus the cumulative amortization of any difference between that initial amount and the maturity amount, and any loss allowance.*

*Interest income is calculated using the effective interest method and is recognized in profit or loss. Changes in fair value are recognized in profit and loss when the asset is derecognized or reclassified.*

*Financial assets classified to amortized cost may be sold where there is an increase in credit risk. Disposals for other reasons are permitted but such sales should be insignificant in value or infrequent in nature.*

(ii) Financial Assets Measured at Fair Value Through Other Comprehensive Income (FVTOCI)

*A financial asset shall be measured at fair value through other comprehensive income if both of the following conditions are met:*

1. *The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and*

2. Persyaratan kontraktual dari aset keuangan menghasilkan arus kas pada tanggal tertentu yang semata dari pembayaran pokok dan bunga dari jumlah pokok terutang.

Aset keuangan tersebut diukur sebesar nilai wajar, dimana keuntungan atau kerugian diakui dalam penghasilan komprehensif lain, kecuali untuk kerugian akibat penurunan nilai dan keuntungan atau kerugian akibat perubahan kurs, diakui pada laba rugi. Ketika aset keuangan tersebut dihentikan pengakuannya atau direklasifikasi, keuntungan atau kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain direklasifikasi dari ekuitas ke laba rugi sebagai penyesuaian reklasifikasi.

**(iii) Aset Keuangan yang Diukur Pada Nilai Wajar Melalui Laba Rugi (FVTPL)**

Aset keuangan yang diukur pada nilai wajar melalui laba rugi adalah aset keuangan yang tidak memenuhi kriteria untuk diukur pada biaya perolehan diamortisasi atau untuk diukur pada nilai wajar melalui penghasilan komprehensif lain.

Setelah pengakuan awal, aset keuangan yang diukur pada nilai wajar melalui laba rugi diukur pada nilai wajarnya. Keuntungan atau kerugian yang timbul dari perubahan nilai wajar aset keuangan diakui dalam laba rugi.

Aset keuangan berupa derivatif dan investasi pada instrumen ekuitas tidak memenuhi kriteria untuk diukur pada biaya perolehan diamortisasi atau kriteria untuk diukur pada FVTOCI, sehingga diukur pada FVTPL. Namun demikian, Grup dapat menetapkan pilihan yang tidak dapat dibatalkan saat pengakuan awal atas investasi pada instrumen ekuitas yang bukan untuk diperjualbelikan dalam waktu dekat (*held for trading*) untuk diukur pada FVTOCI. Penetapan ini menyebabkan semua keuntungan atau kerugian disajikan di penghasilan komprehensif lain, kecuali pendapatan dividen tetap diakui di laba rugi. Keuntungan atau kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain direklasifikasi ke saldo laba tidak melalui laba rugi.

2. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

The financial assets are measured at fair value. The changes in fair value are recognized initially in other comprehensive income, except for impairment losses and gains or losses due to changes in exchange rates, are recognized in profit or loss. When the asset is derecognized or reclassified changes in fair value previously recognized in other comprehensive income and accumulated in equity are reclassified from equity to profit and loss as a reclassification adjustment.

**(iii) Financial Assets Measured at Fair Value Through Profit or Loss (FVTPL)**

Financial assets measured at FVTPL are those which do not meet both criteria for neither amortized costs nor FVTOCI.

After initial recognition, FVTPL financial assets are measured at fair value. The changes in fair value are recognized in profit or loss.

Financial assets in form of derivatives and investment in equity instrument are not eligible to meet both criteria for amortized costs or FVTOCI, hence, these are measured at FVTPL. Nonetheless, the Group may irrevocably designate an investment in an equity instrument which is not held for trading in any time soon as FVTOCI. This designation result in gains or losses to be presented in other comprehensive income, except for dividend income on a qualifying investment which is recognized in profit or loss. Cumulative gains or losses previously recognized in other comprehensive income are reclassified to retained earnings, not to profit or loss.

**Pengukuran Selanjutnya Liabilitas Keuangan**

Grup mengklasifikasikan seluruh liabilitas keuangan sehingga setelah pengakuan awal liabilitas keuangan diukur pada biaya perolehan diamortisasi, kecuali:

1. Liabilitas keuangan pada nilai wajar melalui laba rugi. Liabilitas dimaksud, termasuk derivatif yang merupakan liabilitas, selanjutnya akan diukur pada nilai wajar.
2. Liabilitas keuangan yang timbul ketika pengalihan aset keuangan yang tidak memenuhi kualifikasi penghentian pengakuan atau ketika pendekatan keterlibatan berkelanjutan diterapkan.
3. Kontrak jaminan keuangan dan komitmen untuk menyediakan pinjaman dengan suku bunga dibawah pasar. Setelah pengakuan awal, penerbit kontrak dan penerbit komitmen selanjutnya mengukur kontrak tersebut sebesar jumlah yang lebih tinggi antara:
  - I. jumlah penyisihan kerugian; dan
  - II. jumlah yang pertama kali; diakui dikurangi dengan, jika sesuai, jumlah kumulatif dari penghasilan yang diakui sesuai dengan prinsip PSAK 72.
4. Imbalan kontijensi yang diakui oleh pihak pengakusisi dalam kombinasi bisnis Ketika PSAK 22 diterapkan. Imbalan kontijensi selanjutnya diukur pada nilai wajar dan selisihnya dalam laba rugi

Saat pengakuan awal, Grup dapat membuat penetapan yang takterbatalkan untuk mengukur liabilitas keuangan pada nilai wajar melalui laba rugi, jika diizinkan atau jika penetapan akan menghasilkan informasi yang lebih relevan, karena:

- a) Mengeliminasi atau mengurangi secara signifikan inkonsistensi pengukuran atau pengakuan (kadang disebut sebagai "accounting mismatch") yang dapat timbul dari pengukuran aset atau liabilitas atau pengakuan keuntungan dan kerugian atas aset atau liabilitas dengan dasar yang berbeda beda; atau

**Subsequent Measurement of Financial Liabilities**

The Group shall classify all financial liabilities as subsequently measured at amortised cost, except for:

1. Financial liabilities at fair value through profit or loss. Such liabilities, including derivatives that are liabilities, shall be subsequently measured at fair value.
2. Financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies.
3. Financial guarantee contracts and commitments to provide a loan at a below-market interest rate. After initial recognition, an issuer of such a contract and an issuer of such a commitment shall subsequently measure it at the higher of:
  - I. the amount of the loss allowance; and
  - II. the amount initially recognised; less, when appropriate, the cumulative amount of income recognised in accordance with the principles of PSAK 72.
4. Contingent consideration recognised by an acquirer in a business combination to which PSAK 22 applies. Such contingent consideration shall subsequently be measured at fair value with changes recognised in profit or loss

At initial recognition, the Group may irrevocably designate a financial liability as measured at fair value through profit or loss when permitted or when doing so results in more relevant information, because either:

- a) Eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as "an accounting mismatch") that would otherwise arise from measuring assets or liabilities or recognising the gains and losses on them on different bases; or

- b) sekelompok liabilitas keuangan atau aset keuangan dan liabilitas keuangan dikelola dan kinerjanya dievaluasi berdasarkan nilai wajar, sesuai manajemen risiko atau strategi investasi yang terdokumentasi, dan informasi dengan dasar nilai wajar dimaksud atas kelompok tersebut disediakan secara internal untuk personil manajemen kunci Grup.

#### **Penghentian Pengakuan Aset dan Liabilitas Keuangan**

Grup menghentikan pengakuan aset keuangan, jika dan hanya jika hak kontraktual atas arus kas yang berasal dari aset keuangan berakhir atau Grup mengalihkan hak kontraktual untuk menerima kas yang berasal dari aset keuangan atau tetap memiliki hak kontraktual untuk menerima kas tetapi juga menanggung kewajiban kontraktual untuk membayar arus kas yang diterima tersebut kepada satu atau lebih pihak penerima melalui suatu kesepakatan. Jika Grup secara substansial mengalihkan seluruh risiko dan manfaat atas kepemilikan aset keuangan, maka Grup menghentikan pengakuan aset keuangan dan mengakui secara terpisah sebagai aset atau liabilitas untuk setiap hak dan kewajiban yang timbul atau yang masih dimiliki dalam pengalihan tersebut. Jika Grup secara substansial tidak mengalihkan dan tidak memiliki seluruh risiko dan manfaat atas kepemilikan aset keuangan tersebut dan masih memiliki pengendalian, maka Grup mengakui aset keuangan sebesar keterlibatan berkelanjutan dengan aset keuangan tersebut. Jika Grup secara substansial masih memiliki seluruh risiko dan manfaat atas kepemilikan aset keuangan, maka Grup tetap mengakui aset keuangan tersebut.

Grup menghentikan pengakuan liabilitas keuangan, jika dan hanya jika, liabilitas keuangan tersebut berakhir, yaitu ketika kewajiban yang ditetapkan dalam kontrak dilepaskan atau dibatalkan atau kadawaluarsa.

#### **Penurunan Nilai Aset Keuangan**

Grup mengakui penyisihan kerugian untuk kerugian kredit ekspektasian pada aset keuangan yang diukur pada biaya perolehan diamortisasi, aset keuangan yang diukur pada FVTOCI, piutang sewa, aset kontrak atau komitmen pinjaman dan kontrak jaminan keuangan.

- b) A group of financial liabilities or financial assets and financial liabilities is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the group is provided internally on that basis to the Grup's key management personnel.

#### **Derecognition of Financial Assets and Liabilities**

The Group derecognize a financial asset when, and only when the contractual rights to the cash flows from the financial asset expire or the Group transfer the contractual rights to receive the cash flows of the financial asset or retains the contractual rights to receive the cash flows but assumes a contractual obligation to pay the cash flows to one or more recipients in an arrangement. If the Group transfers substantially all the risks and rewards of ownership of the financial asset, the Group derecognize the financial asset and recognize separately as asset or liabilities any rights and obligation created or retained in the transfer. If the Group neither transfer nor retains substantially all the risks and rewards of ownership of the financial asset and has retained control, the Group continue to recognize the financial asset to the extent of its continuing involvement in the financial asset. If the Group retains substantially all the risks and rewards of ownership of the financial asset, the Group continue to recognize the financial asset.

The Group remove a financial liability from its statement of financial position when, and only when, it is extinguished, ie when the obligation specified in the contract is discharged or cancelled or expires.

#### **Impairment of Financial Assets**

The Group recognizes a loss allowance for expected credit losses on financial asset measured at amortized cost, financial asset measured at FVTOCI, lease receivable, contract asset or loan commitment and financial guarantee contract.

NOTES TO THE CONSOLIDATED  
FINANCIAL STATEMENTS**

For the Years Ended

(Expressed in thousand Rupiah,

Pada setiap tanggal pelaporan, Grup mengukur penyisihan kerugian instrumen keuangan sejumlah kerugian kredit ekspektasian sepanjang umurnya jika risiko kredit atas instrumen keuangan tersebut telah meningkat secara signifikan sejak pengakuan awal. Namun, jika risiko kredit instrumen keuangan tersebut tidak meningkat secara signifikan sejak pengakuan awal, maka Grup mengukur penyisihan kerugian tersebut sejumlah kerugian kredit ekspektasian 12 bulan.

Grup menerapkan pendekatan yang disederhanakan untuk mengukur kerugian kredit ekspektasian atas piutang usaha dan aset kontrak tanpa komponen pendanaan yang signifikan.

Grup menganggap aset keuangan gagal bayar ketika pihak ketiga tidak mampu membayar kewajiban kreditnya kepada Grup secara penuh. Periode maksimum yang dipertimbangkan ketika memperkirakan kerugian kredit ekspektasian adalah periode maksimum kontrak dimana Grup terekspos terhadap risiko kredit.

Grup mengakui jumlah kerugian kredit ekspektasian (atau pemulihan kerugian kredit) dalam laba rugi, sebagai keuntungan atau kerugian penurunan nilai yang merupakan penyesuaian terhadap penyisihan kerugian pada tanggal pelaporan dan disajikan sebagai pengurang nilai tercatat aset keuangan, kecuali untuk aset keuangan yang diukur pada FVTOCI yang penyisihan kerugiannya diakui dalam penghasilan komprehensif lain.

Pengukuran kerugian kredit ekspektasian dari instrumen keuangan dilakukan dengan suatu cara yang mencerminkan:

- i. Jumlah yang tidak bias dan rata-rata probabilitas tertimbang yang ditentukan dengan mengevaluasi serangkaian kemungkinan yang dapat terjadi;
- ii. Nilai waktu atas uang; dan
- iii. Informasi yang wajar dan terdukung yang tersedia tanpa biaya atau upaya berlebihan mengenai peristiwa masa lalu, kondisi kini, dan perkiraan kondisi ekonomi masa depan.

Aset keuangan dapat dianggap tidak mengalami peningkatan risiko kredit secara signifikan sejak pengakuan awal jika aset keuangan memiliki risiko kredit yang rendah pada tanggal pelaporan. Risiko kredit pada

*At the end of each reporting date, the Group measure any loss allowance for financial instruments at an amount equal to the lifetime expected credit loss if the credit risk on the financial instrument has increased significantly since its initial recognition. However, if the credit risk has not increased significantly since initial recognition, then the Group measure the loss allowance for at an amount equal to 12-months expected credit losses.*

*The Group applied a simplified approach to measure such expected credit loss for trade receivables and contract assets without significant financing component.*

*The Group considers a financial asset to be in default when the counterparty is unlikely to pay its credit obligations to the Group in full. The maximum period considered when estimating expected credit loss is the maximum contractual period over which the Group is exposed to credit risk.*

*The Group recognizes the amount of the expected credit loss (or recovery of credit loss) in profit or loss, as an impairment gain or loss which is an adjustment to the loss allowance at the reporting date and is presented as a deduction from the carrying amount of financial assets, except for financial assets measured at FVTOCI where the loss allowance is recognized in other comprehensive income.*

*Measurement of the expected credit losses of financial instruments is conducted in a way that reflects:*

- i. An unbiased and probability-weighted amount that reflects a range of possible outcomes;*
- ii. The time value of money; and*
- iii. Reasonable and supportable information that is available without undue cost or effort about past events, current conditions and forecasts of future economic conditions.*

*Financial assets may be considered to not having significant increase in credit risk since initial recognition if the financial assets have a low credit risk at the reporting date. Credit risk on financial instrument may*

instrumen keuangan dianggap rendah ketika aset keuangan tersebut memiliki risiko gagal bayar yang rendah, peminjam memiliki kapasitas yang kuat untuk memenuhi kewajiban arus kas kontraktualnya dalam jangka waktu dekat dan memburuknya kondisi ekonomi dan bisnis dalam jangka waktu panjang mungkin, namun tidak selalu, menurunkan kemampuan peminjam untuk memenuhi kewajiban arus kas kontraktualnya. Untuk menentukan apakah aset keuangan memiliki risiko kredit rendah, Grup dapat menggunakan peringkat risiko kredit internal atau penilaian eksternal. Misal, aset keuangan dengan peringkat "investment grade" berdasarkan penilaian eksternal merupakan instrumen yang memiliki risiko kredit yang rendah, sehingga tidak mengalami peningkatan risiko kredit secara signifikan sejak pengakuan awal.

#### **Metode Suku Bunga Efektif**

Metode suku bunga efektif adalah metode yang digunakan untuk menghitung biaya perolehan diamortisasi dari aset atau liabilitas keuangan (atau kelompok aset atau liabilitas keuangan) dan metode untuk mengalokasikan pendapatan bunga atau beban bunga selama periode yang relevan.

Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas masa depan selama perkiraan umur dari instrumen keuangan, atau jika lebih tepat, digunakan periode yang lebih singkat untuk memperoleh jumlah tercatat neto dari aset keuangan atau liabilitas keuangan.

Pada saat menghitung suku bunga efektif, Grup mengestimasi arus kas dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrumen keuangan tersebut, seperti pelunasan dipercepat, opsi beli dan opsi serupa lain, tetapi tidak mempertimbangkan kerugian kredit masa depan. Perhitungan ini mencakup seluruh komisi dan bentuk lain yang dibayarkan atau diterima oleh pihak-pihak dalam kontrak yang merupakan bagian tak terpisahkan dari suku bunga efektif, biaya transaksi, dan seluruh premium atau diskonto lain.

#### **Reklasifikasi**

Grup mereklasifikasi aset keuangan ketika Grup mengubah tujuan model bisnis untuk pengelolaan aset keuangan sehingga penilaian sebelumnya menjadi tidak dapat diterapkan.

*be considered be low if there is a low risk of default, the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations. To determine whether a financial asset has a low credit risk, the Group may use internal credit risk rating or external assessment. For example, a financial asset with "investment grade" according to external assessment has a low credit risk rating, thus it does not experience an increase in significant credit risk since initial recognition.*

#### **The Effective Interest Method**

*The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period.*

*The effective interest rate is the rate that exactly discount estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability.*

*When calculating the effective interest rate, the Group estimate cash flows considering all contractual terms of the financial instrument, for example, prepayment, call and similar option, but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.*

#### **Reclassification**

*The Group reclassifies a financial asset if and only if the Group's business model objective for its financial assets changes so its previous model assessment would no longer apply.*

Ketika Grup mereklasifikasi aset keuangan, maka Grup menerapkan reklasifikasi secara prospektif dari tanggal reklasifikasi. Keuntungan, kerugian (termasuk keuntungan atau kerugian penurunan nilai), atau bunga yang diakui sebelumnya tidak disajikan kembali.

Ketika Grup mereklasifikasi aset keuangan keluar dari kategori pengukuran biaya perolehan diamortisasi menjadi kategori FVTPL, nilai wajarnya diukur pada tanggal reklasifikasi. Keuntungan atau kerugian yang timbul dari selisih antara biaya perolehan diamortisasi sebelumnya dan nilai wajar aset keuangan diakui dalam laba rugi. Sebaliknya, jika Grup melakukan reklasifikasi aset keuangan dari kategori FVTPL menjadi kategori pengukuran biaya perolehan diamortisasi, maka nilai wajar pada tanggal reklasifikasi menjadi jumlah tercatat bruto yang baru.

Pada saat Grup mereklasifikasi aset keuangan keluar dari kategori pengukuran biaya perolehan diamortisasi menjadi kategori FVTOCI, nilai wajarnya diukur pada tanggal reklasifikasi. Keuntungan atau kerugian yang timbul dari selisih antara biaya perolehan diamortisasi sebelumnya dan nilai wajar aset keuangan diakui dalam penghasilan komprehensif lain. Suku bunga efektif dan pengukuran kerugian kredit ekspektasian tidak disesuaikan sebagai akibat dari reklasifikasi. Sebaliknya, ketika Grup mereklasifikasi aset keuangan keluar dari kategori FVTOCI menjadi kategori pengukuran biaya perolehan diamortisasi, aset keuangan direklasifikasi pada nilai wajarnya pada tanggal reklasifikasi. Akan tetapi keuntungan atau kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain dihapus dari ekuitas dan disesuaikan terhadap nilai wajar aset keuangan pada tanggal reklasifikasi. Akibatnya, pada tanggal reklasifikasi aset keuangan diukur seperti halnya jika aset keuangan tersebut selalu diukur pada biaya perolehan diamortisasi. Penyesuaian ini memengaruhi penghasilan komprehensif lain tetapi tidak memengaruhi laba rugi, dan karenanya bukan merupakan penyesuaian reklasifikasi. Suku bunga efektif dan pengukuran kerugian kredit ekspektasian tidak disesuaikan sebagai akibat dari reklasifikasi.

*If the Group reclassifies a financial asset, it is required to apply the reclassification prospectively from the reclassification date. Previously recognized gains, losses (including impairment gains or losses) or interest are not restated.*

*When the Group reclassifies its financial asset out of the amortized cost into FVTPL, then its fair value is measured at reclassification date. Any gains or losses resulted from the difference between previous amortized cost and its fair value is recognized in profit or loss. Otherwise, if the Group reclassifies its financial asset from FVTPL into amortized cost, then its fair value at the date of reclassification becomes new gross carrying amount.*

*When the Group reclassifies its financial asset out of the amortized cost into FVTOCI, its fair value is measured at the reclassification date. Any gains or losses resulted from the difference between previous amortized cost and fair value is recognized in other comprehensive income. Effective interest rate and expected credit loss measurement are not adjusted as a result of the reclassification. Otherwise, when the Group reclassifies its financial asset out of FVTOCI into amortized cost, the financial asset is reclassified by its fair value at the reclassification date. However, any cumulative gains or losses previously recognized in other comprehensive income are omitted from equity and adjusted to the financial asset's fair value at the date of reclassification. Consequently, at the reclassification date, the financial asset is measured the same way as if it were amortized cost. This adjustment affects other comprehensive income but not profit or loss, and hence it is not a reclassification adjustment. Effective interest rate and expected credit loss are no longer adjusted as a result of the reclassification.*

Pada saat Grup mereklasifikasi aset keuangan keluar dari kategori FVTPL menjadi kategori FVTOCI, aset keuangan tetap diukur pada nilai wajarnya. Sama halnya, ketika Grup mereklasifikasi aset keuangan keluar dari kategori FVTOCI menjadi kategori FVTPL, aset keuangan diukur pada nilai wajarnya. Keuntungan atau kerugian kumulatif yang sebelumnya diakui di penghasilan komprehensif lain direklasifikasi dari ekuitas ke laba rugi sebagai penyesuaian reklasifikasi pada tanggal reklasifikasi.

#### **Saling Hapus Aset Keuangan dan Liabilitas Keuangan**

Aset keuangan dan liabilitas keuangan disalinghapuskan, jika dan hanya jika, Grup saat ini memiliki hak yang dapat dipaksakan secara hukum untuk melakukan saling hapus atas jumlah yang telah diakui tersebut; dan berintens untuk menyelesaikan secara neto atau untuk merealisasikan aset dan menyelesaikan liabilitasnya secara simultan.

#### **Pengukuran Nilai Wajar**

Nilai wajar adalah harga yang akan diterima untuk menjual suatu aset atau harga yang akan dibayar untuk mengalihkan suatu liabilitas dalam transaksi teratur antara pelaku pasar pada tanggal pengukuran.

Nilai wajar aset dan liabilitas keuangan diestimasi untuk keperluan pengakuan dan pengukuran atau untuk keperluan pengungkapan.

Nilai wajar dikategorikan dalam level yang berbeda dalam suatu hierarki nilai wajar berdasarkan pada apakah input suatu pengukuran dapat diobservasi dan signifikansi input terhadap keseluruhan pengukuran nilai wajar:

- i. Harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses pada tanggal pengukuran (Level 1);
- ii. Input selain harga kuotasian yang termasuk dalam Level 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung maupun tidak langsung (Level 2);
- iii. Input yang tidak dapat diobservasi untuk aset atau liabilitas (Level 3).

*When the Group reclassifies its financial asset out of FVTPL into FVTOCI, the financial asset is measured at its fair value. Similarly, when the Group reclassifies its financial asset out of FVTOCI into FVTPL, the financial asset is measured at its fair value. Any gains or losses previously recognized in other comprehensive income are reclassified out of the equity to profit or loss as a reclassification adjustment at the date of reclassification.*

#### **Offsetting a Financial Asset and a Financial Liability**

*A financial asset and financial liability shall be offset when and only when, the Group currently has a legally enforceable right to set off the recognized amount; and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.*

#### **Fair Value Measurement**

*Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.*

*The fair value of financial assets and financial liabilities must be estimated for recognition and measurement or for disclosure purposes.*

*Fair values are categorised into different levels in a fair value hierarchy based on the degree to which the inputs to the measurement are observable and the significance of the inputs to the fair value measurement in its entirety:*

- i. *Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be accessed at the measurement date (Level 1);*
- ii. *Inputs other than quoted prices included in Level 1 that are observable for the assets or liabilities, either directly or indirectly (Level 2);*
- iii. *Unobservable inputs for the assets or liabilities (Level 3).*

Dalam mengukur nilai wajar aset atau liabilitas, Grup sebisa mungkin menggunakan data pasar yang dapat diobservasi. Apabila nilai wajar aset atau liabilitas tidak dapat diobservasi secara langsung, Grup menggunakan teknik penilaian yang sesuai dengan keadaannya dan memaksimalkan penggunaan input yang dapat diobservasi yang relevan dan meminimalkan penggunaan input yang tidak dapat diobservasi.

Perpindahan antara level hierarki nilai wajar diakui oleh Grup pada akhir periode pelaporan dimana perpindahan terjadi.

**h. Kas dan Bank**

Kas dan bank terdiri dari saldo kas dan kas di bank (rekening giro) dan tidak digunakan sebagai jaminan atau tidak dibatasi penggunaannya.

**i. Persediaan**

Persediaan dinyatakan berdasarkan biaya perolehan atau nilai realisasi bersih, mana yang lebih rendah. Biaya perolehan ditentukan dengan metode rata-rata tertimbang untuk barang jadi dan barang dalam proses serta metode rata-rata bergerak untuk bahan baku, penolong dan suku cadang. Harga perolehan barang jadi dan barang dalam proses terdiri dari biaya bahan baku, tenaga kerja langsung, biaya-biaya langsung lainnya dan biaya *overhead* yang dinyatakan sebesar nilai yang terkait dengan produksi. Nilai realisasi bersih adalah taksiran harga jual dalam kegiatan usaha dikurangi taksiran biaya penyelesaian dan taksiran biaya yang diperlukan untuk melakukan penjualan.

**j. Aset Tetap**

Aset tetap yang dimiliki untuk digunakan dalam produksi atau penyediaan barang atau jasa atau untuk tujuan administratif dicatat berdasarkan biaya perolehan setelah dikurangi akumulasi penyusutan dan akumulasi kerugian penurunan nilai (Catatan 2.o). Harga perolehan termasuk pengeluaran yang dapat diatribusikan secara langsung atas perolehan aset tersebut. Biaya perolehan juga termasuk estimasi biaya pembongkaran, dan pemindahan aset tetap, dan restorasi lokasi aset.

*When measuring the fair value of an asset or a liability, the Group uses market observable data to the extent possible. If the fair value of an asset or a liability is not directly observable, the Group uses valuation techniques that appropriate in the circumstances and maximizes the use of relevant observable inputs and minimizes the use of unobservable inputs.*

*Transfers between levels of the fair value hierarchy are recognized by the Group at the end of the reporting period during which the change occurred.*

**h. Cash on Hand and in Banks**

*Cash on Hand and in banks consist of cash on hand and cash in banks (demand deposits) that are not used as collateral or are not restricted.*

**i. Inventories**

*Inventories are stated at cost or net realizable value, whichever is lower. Cost is determined using the weighted average method for finished goods and work-in-progress and using the moving average method for raw and indirect materials and spare parts. The cost of finished goods and work-in-progress comprises of raw and indirect materials, direct labor, other direct costs and related production overheads. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated selling cost necessary to make the sale.*

**j. Fixed Assets**

*Fixed assets held for use in the production or supply of goods or services, or for administrative purposes, are stated at cost, less accumulated depreciation and any accumulated impairment losses (Note 2.o). Historical cost includes expenditure that is directly attributable to the acquisition of the items. Such cost also includes estimated costs of dismantling and removing of the item and restoring the site on which the asset is located.*

#### **k. Aset Takberwujud**

Aset takberwujud diakui jika kemungkinan besar Grup akan memperoleh manfaat ekonomis masa depan dari aset takberwujud tersebut dan biaya perolehan aset tersebut dapat diukur secara andal.

#### **k. Intangible Assets**

*Intangible assets are recognized when it is probable that the Group will obtain future economic benefits from the intangible asset and the cost of the asset can be measured reliably.*

Aset takberwujud dicatat berdasarkan biaya perolehan dikurangi akumulasi amortisasi dan rugi penurunan nilai, apabila ada. Aset takberwujud diamortisasi selama estimasi masa manfaatnya. Grup mengestimasi nilai yang dapat diperoleh kembali dari aset takberwujud. Apabila nilai tercatat aset takberwujud melebihi estimasi nilai yang dapat diperoleh kembali, maka nilai tercatat aset tersebut diturunkan menjadi sebesar estimasi jumlah terpulihkan.

*Intangible assets are recorded at cost less accumulated amortization and impairment losses, if any. Intangible assets are amortized over their estimated useful lives. Aset takberwujud dibawah ini diamortisasi dengan menggunakan metode garis lurus berdasarkan estimasi masa manfaat aset takberwujud sebagai berikut:

*The intangible assets below are amortized using the straight-line method based on the estimated useful lives of the intangible assets as follows:*

Tanah pertambangan didepleksi dengan menggunakan metode unit produksi berdasarkan estimasi cadangan.

*Mining properties are depleted using the unit of production method based on estimated reserves.*

Aset takberwujud dihentikan pengakuannya ketika aset tersebut dilepaskan atau ketika tidak terdapat lagi manfaat ekonomis masa depan yang diharapkan dari penggunaan atau pelepasan aset tersebut. Selisih dalam laporan antara nilai tercatat aset dengan hasil neto yang diterima dari pelepasannya diakui dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

*Intangible assets are derecognized when the asset is disposed of or when no future economic benefits are expected from the use or disposal of the asset. The difference in the statement between the carrying amount of the asset and the net proceeds received from its disposal is recognized in the consolidated statements of profit or loss and other comprehensive income.*

**l. Properti Pertambangan**

Ketika keputusan pengembangan telah diambil, yaitu pada saat cadangan terpulihkan yang secara ekonomis dapat diidentifikasi, jumlah tercatat dalam akun Aset Eksplorasi dan Evaluasi pada *area of interest* tertentu dipindahkan ke akun Properti Pertambangan dan digabungkan dengan pengeluaran pengembangan selanjutnya.

Biaya pengembangan yang dikeluarkan oleh Grup dicatat secara terpisah untuk setiap *area of interest*. Biaya-biaya tersebut terdiri dari biaya-biaya yang dapat diatribusikan secara langsung pada konstruksi tambang dan infrastruktur yang terkait, tetapi tidak termasuk perolehan aset berwujud dan hak atas tanah yang dicatat sebagai Aset Tetap.

Ketika terjadi biaya pengembangan lebih lanjut atas suatu properti pertambangan setelah dimulainya produksi, maka biaya tersebut akan diperlakukan sebagai aset dan dicatat sebagai bagian dari akun Properti Pertambangan yaitu apabila terdapat kemungkinan besar akan ada tambahan manfaat ekonomis masa depan. Namun apabila tidak mempunyai manfaat ekonomis masa depan, biaya tersebut langsung dibebankan sebagai biaya produksi.

Properti pertambangan teridentifikasi yang diperoleh melalui suatu kombinasi bisnis pada awalnya diakui sebagai aset sebesar nilai wajarnya. Pengeluaran pengembangan yang terjadi setelah akuisisi properti pertambangan dicatat berdasarkan kebijakan akuntansi yang dijelaskan di atas.

Properti Pertambangan diuji penurunan nilainya dengan mengacu pada kebijakan akuntansi dalam Catatan 2.o.

**m. Aset Eksplorasi dan Evaluasi**

Aktivitas eksplorasi dan evaluasi meliputi pencarian sumber daya mineral setelah Grup memperoleh hak hukum untuk mengeksplorasi *area of interest* tertentu, menentukan kelayakan teknis dan menilai aspek komersial sumber daya mineral yang teridentifikasi.

Pengeluaran eksplorasi dan evaluasi meliputi biaya yang berhubungan langsung dengan perolehan hak untuk eksplorasi, kajian topografi, geologi, geokimia dan geofisika, pengeboran eksplorasi, pamaritan dan pengambilan contoh, serta aktivitas lainnya yang terkait dengan evaluasi kelayakan teknis dan komersial atas penambangan sumber daya mineral yang bersangkutan.

**l. Mining Properties**

*Once a development decision has been taken, that is, when an economically recoverable reserve can be identified, the carrying amount of the Exploration and Evaluation assets in respect of the area of interest is transferred to Mining Properties and aggregated with the subsequent development expenditure.*

*Development expenditure incurred by the Group is recorded separately for each area of interest in. Such expenditure comprises costs directly attributable to the construction of a mine and the related infrastructure and excludes physical assets and land rights, which are recorded as Fixed Assets.*

*When further development expenditure is incurred on a mining property after the commencement of production, the expenditure is carried forward as asset and as part of Mining Properties when it is probable that additional future economic benefits. Otherwise, such expenditure is classified as a cost of production.*

*Identified mining properties acquired in a business combination are initially recognized as assets at their fair value. Development expenses incurred subsequent to the acquisition of the mining properties are accounted for in accordance with the policy described above.*

*Mining Properties are tested for impairment in accordance with the accounting policy in Note 2.o.*

**m. Exploration and Evaluation Assets**

*Exploration and evaluation activity involves the search for mineral resources after the Group has obtained legal rights to explore in a specific area of interest, determination of the technical feasibility and assessment of the commercial viability of an identified resource.*

*Exploration and evaluation expenditure comprises costs that are directly attributable to acquisition of rights to explore, topographical, geological, geochemical and geophysical studies, exploratory drilling, trenching and sampling, activities involved in evaluating the technical feasibility and commercial viability of extracting mineral resources.*

Pengeluaran eksplorasi dan evaluasi yang berhubungan dengan suatu *area of interest* dibebankan pada saat terjadinya. Pengeluaran eksplorasi dan eksploitasi dikapitalisasi apabila memenuhi salah satu dari keadaan berikut ini:

- (i). Hak untuk mengeksplorasi dan mengevaluasi suatu *area of interest* masih berlaku dan pengeluaran tersebut diharapkan dapat diperoleh kembali melalui keberhasilan pengembangan dan eksploitasi atau penjualan *area of interest* tersebut; atau
- (ii). Kegiatan eksplorasi dalam *area of interest* belum mencapai tahap yang memungkinkan penentuan adanya cadangan terbukti yang secara ekonomis dapat diperoleh. Di samping itu, aktivitas signifikan yang berkaitan dengan *area of interest* tersebut masih berlangsung.

Pengeluaran yang dikapitalisasi mencakup biaya-biaya yang berkaitan langsung dengan aktivitas eksplorasi dan evaluasi pada *area of interest* yang bersangkutan, kecuali perolehan aset berwujud yang dicatat sebagai aset tetap. Biaya umum dan administrasi diatribusikan sebagai aset eksplorasi atau evaluasi hanya jika biaya tersebut berkaitan langsung dengan aktivitas operasional pada *area of interest* yang bersangkutan.

Pengeluaran eksplorasi dan evaluasi yang dikapitalisasi dihapusbukukan ketika kondisi tersebut di atas tidak lagi terpenuhi.

Oleh karena aktivitas eksplorasi dan evaluasi belum memasuki tahapan eksploitasi, maka Aset Eksplorasi dan Evaluasi tidak diamortisasi.

Aset Eksplorasi dan Evaluasi diuji penurunan nilainya ketika fakta dan kondisi mengindikasikan adanya penurunan nilai. Aset ini juga diuji penurunan nilainya ketika terjadi penemuan cadangan komersial, sebelum ditransfer ke akun Properti Pertambangan - Tambang dalam Pengembangan.

Pengeluaran yang terjadi sebelum Grup memperoleh hak hukum untuk mengeksplorasi suatu *area of interest* tertentu dibebankan sebagai biaya pada saat terjadinya.

*Exploration and evaluation expenditure related to an area of interest is written off as incurred, unless it is capitalized and carried forward, on an area of interest basis, provided that one of the following conditions is met:*

- (i). The rights of tenure of an area are current and it is considered probable that the costs will be recouped through successful development and exploitation of the area of interest or, alternatively, by its sale; or*
- (ii). Exploration activities in the area of interest have not yet reached the stage which would permit a reasonable assessment of the existence or otherwise of economically recoverable reserves and active and significant operations in or in relation to the area of interest are continuing.*

*Capitalized costs include expenditures directly related to exploration and evaluation activities in the relevant area of interest and exclude physical assets, which are recorded in property, plant and equipment. General and administrative costs are allocated to an exploration or evaluation asset only to the extent that those expenditures can be related directly to operations activities in the relevant area of interest.*

*Capitalized exploration and evaluation expenditure is written off where the above conditions are no longer fulfilled.*

*As exploration and evaluation activities has not entered the exploitation stage, the Exploration and Evaluation Assets are not amortized.*

*Exploration and Evaluation Assets are assessed for impairment if facts and circumstances indicate that impairment may exist. Exploration and evaluation assets are also tested for impairment once commercial reserves are found, before the assets are transferred to Mining Properties - Mines under Development.*

*Expenditure incurred before the Group has obtained the legal right to explore an area of interest is expensed as incurred.*

**n. Reklamasi Tambang**

Reklamasi tambang dicatat berdasarkan nilai kini taksiran biaya atas kewajiban hukum dan kewajiban konstruktif yang disyaratkan untuk memulihkan kondisi wilayah pertambangan akibat operasi pertambangan pada periode dimana kewajiban tersebut terjadi. Rehabilitasi tambang terdiri dari aktivitas reklamasi dan penutupan tambang yang meliputi aktivitas pembongkaran dan pemindahan bangunan, rehabilitasi pertambangan dan bendungan *tailing*, pembongkaran fasilitas operasi, penutupan pabrik dan lokasi penampungan limbah, dan restorasi, reklamasi dan penanaman kembali di lokasi-lokasi yang terganggu.

Kewajiban pada umumnya timbul pada saat suatu aset dipasang atau tanah/lingkungan terganggu di area operasi pertambangan. Pada saat pengakuan awal kewajiban, nilai kini dari estimasi biaya dikapitalisasi dengan meningkatkan nilai tercatat aset pertambangan terkait sepanjang biaya tersebut terjadi sebagai akibat aktivitas pengembangan dan konstruksi di area tambang.

Kewajiban reklamasi dan penutupan tambang yang timbul pada tahap produksi dibebankan saat terjadinya. Dengan berlalunya waktu, kewajiban yang didiskonto akan meningkat karena perubahan nilai kini berdasarkan tingkat diskonto yang mencerminkan nilai pasar saat ini dan risiko yang melekat pada kewajiban tersebut. Peningkatan kewajiban yang mencerminkan berlalunya waktu diakui dalam Laporan Laba Rugi dan Komprehensif Lain Konsolidasian.

Perubahan biaya reklamasi dan penutupan tambang diakui sebagai penambahan pada Provisi Rehabilitasi Tambang pada saat terjadinya.

**o. Penurunan Nilai Aset**

Pada setiap akhir periode pelaporan, Grup menilai apakah terdapat indikasi bahwa aset mengalami penurunan nilai. Jika terdapat indikasi tersebut, Grup mengestimasi jumlah terpulihkan dari aset tersebut. Jumlah yang terpulihkan ditentukan untuk setiap aset secara individual, dan jika hal ini tidak dimungkinkan, Grup menentukan jumlah terpulihkan dari unit penghasil kas aset tersebut.

**n. Mine Reclamation**

*Mine reclamation recorded the present value of estimated costs of legal and constructive obligations required to restore the condition of mining area caused by mining operations in the period in which the obligation is incurred. Mine rehabilitation includes activities for dismantling and removing structures, rehabilitating mines and tailings dams, dismantling operating facilities, closure of plant and waste site, and restoration, reclamation and re-vegetation of affected areas.*

*The obligation normally arises when the asset is installed or the land/environment is disturbed by mining operations. At the initial recognition of the liability, the present value of the estimated costs is capitalized by increasing the carrying amount of the related mining assets to the extent that it was incurred as a result of the development and construction activities in the mining areas.*

*Any reclamation and mine closure obligations that arise through the production phase are expensed as incurred. Over time, the discounted liability is increased for the change in present value based on the discount rates that reflect current market assessments and the risk specific to the liability. The periodic unwinding of the discount is recognized in the Consolidated Statement of Other Comprehensive Income.*

*Changes in reclamation and mine closure costs are recognized as additions in Provision for Mine Rehabilitation when they occur.*

**o. Impairment of Assets**

*At the end of each reporting period, the Group assess whether there is any indication that an asset may be impaired. If any such indication exists, the Group shall estimate the recoverable amount of the asset. Recoverable amount is determined for an individual asset, if its is not possible, the Group determines the recoverable amount of the asset's cash-generating unit.*

Jumlah terpulihkan adalah jumlah yang lebih tinggi antara nilai wajar dikurangi biaya pelepasan dibandingkan dengan nilai pakainya. Nilai pakai adalah nilai kini dari arus kas yang diharapkan akan diterima dari aset atau unit penghasil kas yang bersangkutan. Nilai kini dihitung dengan menggunakan tingkat diskonto sebelum pajak yang mencerminkan nilai waktu uang dan risiko spesifik atas aset atau unit penghasil kas aset tersebut.

Jika jumlah terpulihkan suatu aset lebih kecil dari jumlah tercatatnya, maka jumlah tercatat aset diturunkan menjadi sebesar jumlah terpulihkannya. Penurunan tersebut segera diakui dalam laba rugi.

Rugi penurunan nilai yang telah diakui dalam periode sebelumnya, selain *goodwill*, akan dikembalikan jika terdapat perubahan estimasi yang digunakan dalam menentukan jumlah terpulihkan aset tersebut sejak rugi penurunan nilai yang terakhir diakui. Jika hal ini yang terjadi, maka jumlah tercatat aset tersebut dinaikkan ke jumlah terpulihkannya. Kenaikan ini merupakan pembalikan dari rugi penurunan nilai sebelumnya.

**p. Pajak Penghasilan**

Manfaat atau beban pajak adalah jumlah keseluruhan pajak penghasilan baik kini maupun tangguhan yang diperhitungkan dalam menentukan laba rugi untuk suatu periode. Pajak kini dan pajak tangguhan diakui dalam laporan laba rugi, kecuali pajak penghasilan yang timbul dari transaksi atau peristiwa yang diakui dalam penghasilan komprehensif lain atau secara langsung di ekuitas. Jika hal ini yang terjadi, pajak tersebut diakui dalam penghasilan komprehensif lain atau ekuitas.

Liabilitas atau aset pajak kini untuk periode berjalan dan periode sebelumnya diukur dengan jumlah yang diperkirakan akan dibayar kepada atau direstitusi dari otoritas perpajakan, yang dihitung dengan menggunakan tarif pajak yang berlaku.

2. Identifikasi kewajiban pelaksanaan dalam kontrak. Kewajiban pelaksanaan merupakan janji-janji dalam kontrak untuk menyerahkan barang atau jasa yang memiliki karakteristik berbeda ke pelanggan.
3. Penetapan harga transaksi. Harga transaksi merupakan jumlah imbalan yang berhak diperoleh suatu entitas sebagai kompensasi atas diteruskannya barang atau jasa yang dijanjikan ke pelanggan. Jika imbalan yang dijanjikan di kontrak mengandung suatu jumlah yang bersifat variabel, maka Grup membuat estimasi jumlah imbalan tersebut sebesar jumlah yang diharapkan berhak diterima atas diteruskannya barang atau jasa yang dijanjikan ke pelanggan dikurangi dengan estimasi jumlah jaminan kinerja jasa yang akan dibayarkan selama periode kontrak.
4. Alokasi harga transaksi ke setiap kewajiban pelaksanaan dengan menggunakan dasar harga jual berdiri sendiri relatif dari setiap barang atau jasa berbeda yang dijanjikan di kontrak. Ketika tidak dapat diamati secara langsung, harga jual berdiri sendiri relatif diperkirakan berdasarkan biaya yang diharapkan ditambah marjin.
5. Pengakuan pendapatan ketika kewajiban pelaksanaan telah dipenuhi dengan menyerahkan barang atau jasa yang dijanjikan ke pelanggan (ketika pelanggan telah memiliki kendali atas barang atau jasa tersebut).

Pendapatan dari penjualan barang diakui ketika pengendalian dialihkan kepada pelanggan. Terdapat kondisi di mana pertimbangan diperlukan berdasarkan lima indikator pengendalian di bawah ini:

2. Pelanggan memiliki kewajiban kini untuk membayar sesuai dengan syarat dan ketentuan dalam kontrak penjualan.

3. *Determine the transaction price. Transaction price is the amount of consideration to which an entity expects to be entitled in exchange for transferring promised goods or services to a customer. If the consideration promised in a contract includes a variable amount, the Group estimates the amount of consideration to which it expects to be entitled in exchange for transferring the promised goods or services to a customer less the estimated amount of service level guarantee which will be paid during the contract period.*
4. *Allocate the transaction price to each performance obligation based on the relative stand-alone selling prices of each distinct goods or services promised in the contract. Where these are not directly observable, the relative standalone selling price are estimated based on expected cost-plus margin.*
5. *Recognize revenue when performance obligation is satisfied by transferring a promised goods or services to a customer (which is when the customer obtains control of that goods or services).*

*Revenue from sales of goods is recognized when control transfers to the customer. There may be circumstances when judgement is required based on the five indicators of control below:*

2. *The customer has a present obligation to pay in accordance with the terms of the sales contract.*

Historically, the differences between estimated and actual grade and/or quantity are not significant.
4. The customer has legal title to the goods.

- For each performance obligation satisfied over time, the Group recognises revenue over time by measuring the progress towards complete satisfaction of that performance obligation.

The Group applies the output method for measuring progress. The Group excludes from the measure of progress any goods or services for which the Group does not transfer control to a customer.

The Group recognises revenue for a performance obligation satisfied overtime only if the Group can reasonably measure its progress towards complete satisfaction of the performance obligation. In some circumstances, the Group may not be able to reasonably measure the outcome of a performance obligation, but the Group expects

Suatu kontrak merupakan, atau mengandung sewa jika kontrak tersebut memberikan hak untuk mengendalikan penggunaan suatu aset identifikasi selama suatu jangka waktu untuk dipertukarkan dengan imbalan. Untuk menilai apakah suatu kontrak memberikan hak untuk mengendalikan suatu aset identifikasi, Grup menilai apakah:

- a. Jika pemasok memiliki hak substitusi substantif, maka aset tersebut tidak teridentifikasi;

If the supplier has the substantive substitution right, then the asset is not identified;
- b. The Group has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- c. The Group has the right to direct the use of the identified asset. The Group has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In certain circumstances where all the decisions about how and for what purpose the asset is used are predetermined, the Group has the right to direct the use of the asset if either:
  - The Group has the right to operate the asset; or
  - The Group designed the asset in a way that predetermines how and for what purpose the asset will be used.

At inception date or on reassessment of a contract that contains a lease component, the Group allocates consideration in the contract to each lease component on the basis of their relative stand-alone prices.

Pembayaran sewa yang termasuk dalam indeks utang sewa meliputi: pembayaran sewa tetap, sewa variabel yang bergantung pada indeks, jumlah yang akan dibayarkan dalam jaminan nilai residu dan harga eksekusi opsi beli, opsi perpanjangan atau penalti penghentian jika Perusahaan cukup pasti akan mengeksekusi opsi tersebut.

Grup mengakui aset hak-guna dan liabilitas sewa pada tanggal dimulainya sewa. Aset hak-guna awalnya diukur pada biaya perolehan, yang terdiri dari jumlah pengukuran awal dari liabilitas sewa disesuaikan dengan pembayaran sewa yang dilakukan pada atau sebelum tanggal permulaan, ditambah dengan biaya langsung awal yang dikeluarkan, dan estimasi biaya untuk membongkar dan memindahkan aset pendasar atau untuk merestorasi aset pendasar atau tempat di mana aset berada, dikurangi insentif sewa yang diterima.

Jika sewa mengalihkan kepemilikan aset pendasar pada akhir masa sewa atau jika biaya perolehan aset hak-guna merefleksikan penyewa akan mengeksekusi opsi beli, maka penyewa menyusutkan aset hak-guna dari tanggal permulaan hingga akhir umur manfaat aset pendasar. Periode penyusutan untuk aset hak-guna dengan opsi beli yang dieksekusi tersebut mengacu pada ketentuan masa manfaat aset tetap.

Liabilitas sewa awalnya diukur pada nilai kini atas pembayaran sewa yang belum dibayar pada tanggal permulaan, didiskontokan menggunakan suku bunga implisit dalam sewa atau, jika suku bunga tersebut tidak dapat ditentukan, digunakan suku bunga pinjaman inkremental Grup. Umumnya, Grup menggunakan suku bunga pinjaman inkremental sebagai suku bunga diskonto.

Setelah pengakuan awal liabilitas sewa diukur pada biaya perolehan diamortisasi menggunakan metode suku bunga efektif. Liabilitas sewa diukur kembali ketika ada perubahan pembayaran sewa masa depan yang timbul dari perubahan indeks atau suku bunga, jika ada perubahan estimasi Grup atas jumlah yang diperkirakan akan dibayar dalam jaminan nilai residual, atau jika Grup mengubah penilaiannya apakah akan mengeksekusi opsi beli, perpanjangan atau penghentian.

*Lease payments included in the measurement of the lease liability comprise the following: fixed payments, variable lease payments that depend on an index, amounts expected to be payable under a residual value guarantee and the exercise price under a purchase option, optional renewal period or penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.*

*The Group recognizes a right-of-use asset and a lease liability at the lease commencement date. The right of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.*

*If the lease transfers the ownership of the underlying asset at the end of the lease term, then the asset will be depreciated from the beginning of the lease term to the end of the underlying asset's useful life. The depreciation periods for the right-of use assets with buy options executed should refer to the policy for the fixed assets.*

*The lease liability is initially measured at the present value of the lease payments that are not yet paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group incremental borrowing rate. Generally, Group uses its incremental borrowing rate as the discount rate.*

*After the initial acquisition of a lease liability is measured at amortized cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group estimate of the amount expected to be payable under a residual value guarantee, or if the Group changes its assessment of whether it will exercise a purchase, extension or termination option.*

*When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right of use assets, or is recorded in profit or loss if the carrying amount of the right of use asset has been reduced to zero.*

**Accounting Treatment for Short-Term and Low-Value Leases**

*Short-term leases are leases with a lease term of 12 months or less. Low-value assets are the value of lease assets less than the maximum amount of low value set in The Group's policy.*

Useful Lives of Fixed Assets

The Group periodically reviews the economic useful lives of fixed assets based on factors such as technical specifications and future technological developments, as well as estimation of the economic life of mineral reserves containing uncertainty.

The carrying amount of fixed asset presented in Note 11.

Post-employment Benefits

The present value of the post-employment benefits obligation depends on several factors determined based on various assumptions, which consist of, among other things: discount rate, salary growth rate, mortality rate, disability rate, and resignation rate. Changes in assumptions can affect the carrying amount of post-employment benefits.

Allowance for Impairment Losses of Financial Assets

Allowance for impairment losses for financial assets has been measured at an amount equal to lifetime expected credit loss if the credit risk of the financial instrument has increased significantly since its initial recognition. The *Expected Credit Loss* on financial assets are estimated using a provision matrix refer to past default history of the customers and an analysis of the customers current financial position, and adjusted for specific factors to the customers, general economic conditions of the industry in which the customers operate.

Financial instrument is written off when there is information indicating that the customers is in severe financial difficulty and there is no realistic prospect of recovery. The carrying amount of financial assets presented in Note 38.

Realization of Deferred Tax Assets

Deferred tax assets are recognized for all unused tax loss to the extent that it is probable that taxable profit will be available against which the loss can be utilized. Management estimates are required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Penentuan Estimasi Cadangan Mineral

Penentuan estimasi cadangan mineral menimbulkan ketidakpastian dalam penentuan angka-angka di laporan keuangan. Estimasi cadangan mineral terbukti dan terkira menjadi dasar dalam penentuan berbagai angka di laporan posisi keuangan dan laporan laba rugi dan penghasilan komprehensif lain Grup. Cadangan mineral terbukti dan terkira merupakan estimasi jumlah hasil yang dapat dieksploitasi secara ekonomis dan legal dari properti pertambangan Grup. Grup menentukan dan melaporkan cadangan mineral berdasarkan prinsip-prinsip yang ditetapkan oleh Komite Cadangan Mineral Indonesia (KCMI). Dalam mengestimasi cadangan mineral, diperlukan berbagai asumsi seperti faktor geologi, teknis dan ekonomi, termasuk jumlah, teknik produksi, rasio pengupasan tanah, biaya produksi, biaya transportasi, permintaan dan harga komoditas yang bersangkutan, serta nilai tukar mata uang.

Estimasi jumlah dan nilai kandungan cadangan mineral memerlukan ukuran, bentuk dan kedalaman dari mineral yang bersangkutan yang penentuannya dilakukan dengan analisis atas data geologis, yang diperoleh dari sampel pengeboran. Proses ini mungkin memerlukan pertimbangan yang kompleks dan sulit dalam menginterpretasikan data.

Karena asumsi-asumsi ekonomi yang digunakan untuk membuat estimasi atas jumlah cadangan dapat berubah dari waktu ke waktu dan karena adanya data geologi tambahan yang dihasilkan selama periode operasi, maka jumlah estimasi cadangan dapat juga berubah dari waktu ke waktu. Perubahan cadangan yang dilaporkan dapat mempengaruhi hasil keuangan dan posisi keuangan Grup, di antaranya:

- a. Nilai aset tercatat dapat terpengaruh akibat perubahan estimasi arus kas masa depan;
- b. Penyusutan, deplesi dan amortisasi yang dibebankan dalam laporan laba rugi dan penghasilan komprehensif lain dapat berubah jika biaya tersebut ditentukan berdasarkan basis satuan unit produksi, atau jika terdapat perubahan dalam masa manfaat ekonomis aset;
- c. Pencadangan untuk biaya pembongkaran, restorasi lokasi dan lingkungan dapat berubah karena adanya perubahan dalam estimasi waktu dan besarnya biaya untuk melakukan kegiatan-kegiatan tersebut.

Determining Mineral Reserve Estimates

Determination of estimated mineral reserves creates uncertainty in determining the numbers in the financial statements. Estimates of proven and probable reserves form the basis for determining various figures in the statement of financial position and statement of profit or loss and other comprehensive income of the Group. Proven and probable mineral reserves are estimates of the amount of results that can be economically and legally exploited from the Group's mining properties. The Group determines and reports mineral reserves based on the principles set by the Indonesian Mineral Reserves Committee (KCMI). In order to estimate mineral reserves, assumptions are required about a range of geological, technical and economic factors, including quantities, production techniques, stripping ratio, production costs, transportation costs, commodity demand, commodity prices and exchange rates.

Estimating the quantity and/or mineral content of mineral reserves requires the size, shape and depth of mineral bodies or fields to be determined by analyzing geological data such as drilling samples. This process may require complex and difficult geological judgements to interpret the data.

Because the economic assumptions used to estimate reserves change from period to period and because additional geological data are generated during the course of operations, estimates of reserves may change from period to period. Changes in the reported reserves may affect the Group's financial results and financial position in a number of ways, including the following:

- a. Assets carrying values may be affected due to changes in the estimated future cash flows;
- b. Depreciation, depletion and amortization charged to profit or loss may change where such charges are determined on the units-of-production basis, or where the useful economic lives of assets change;
- c. Decommissioning, site restoration and environmental provisions may change where changes in estimated reserves affect expectations about the timing or cost of these activities.

**Penentuan Provisi Rehabilitasi Tambang**

Grup menilai provisi rehabilitasi tambang secara tahunan. Estimasi dan asumsi signifikan yang digunakan dalam menentukan provisi rehabilitasi tambang, antara lain adalah biaya aktivitas rehabilitasi, perubahan teknologi dan perubahan peraturan. Ketidakpastian estimasi dan asumsi tersebut dapat mengakibatkan perbedaan antara jumlah yang sudah diprovisikan dengan biaya aktual dimasa depan.

**Pertimbangan dalam Penentuan Kebijakan Akuntansi**

Pertimbangan berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Grup yang memiliki pengaruh signifikan pada angka-angka dalam laporan keuangan konsolidasian Grup:

**Penentuan Kapitalisasi Biaya Eksplorasi dan Evaluasi Serta Biaya Pengembangan**

Kebijakan akuntansi yang ditetapkan oleh Grup untuk aset eksplorasi dan evaluasi serta properti pertambangan - tambang dalam pengembangan memerlukan pertimbangan manajemen dalam menentukan manfaat ekonomis masa depan dari aktivitas eksploitasinya di masa yang akan datang. Jika tidak terdapat manfaat ekonomis dari aktivitas eksploitasi di masa depan, aktivitas eksplorasi, evaluasi, dan pengembangan harus dihentikan, dan seluruh biaya-biaya yang terkait harus dibebankan sebagai biaya eksplorasi dan evaluasi atau biaya properti pertambangan - tambang dalam pengembangan. Dengan demikian, terdapat ketidakpastian yang signifikan tentang kapitalisasi atau pembebanan dari biaya-biaya ini.

**Determining Provision for Mine Rehabilitation**

The Group assess its provision for mine rehabilitation on an annual basis. Significant estimates and assumptions are used in determining the provision for mine rehabilitation, such as the cost for rehabilitation activities, technological changes and regulatory changes. The uncertainty of estimates and assumptions may cause difference between the amount that has been projected and the actual costs in the future.

**Judgments in Applying the Accounting Policies**

The following judgments are made by management in the process of applying the Group's accounting policies that have the most significant effects on the amounts recognized in the consolidated financial statements:

**Determining Capitalization of Exploration and Evaluation Costs and Development Costs**

The accounting policies established by the Group for exploration and evaluation assets and mining properties - mines under development require management consideration in determining the future economic benefits of their exploitation activities in the future. If there are no economic benefits from future exploitation activities, exploration, evaluation and development activities must be stopped, and all related costs must be charged as exploration and evaluation costs or mining property - mines under development cost. Accordingly, there is significant uncertainty about the capitalization or imposition of these costs.

Program pensiun imbalan pasti memberikan eksposur Grup terhadap risiko aktuarial seperti risiko tingkat bunga dan risiko gaji.

The defined benefit pension plan typically exposes the Group to actuarial risks such as interest rates risk and salary risk.

Risiko Tingkat Bunga

Penurunan suku bunga obligasi akan meningkatkan liabilitas program.

Interest Rate Risk

A decrease in the bond interest rate will increase the plan liability.

Risiko Gaji

Nilai kini kewajiban imbalan pasti dihitung dengan mengacu pada gaji masa depan peserta program. Dengan demikian, kenaikan gaji peserta program akan meningkatkan liabilitas program itu.

Salary Risk

The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.
