#### **The Board of Commissioners' Perspective on the Company's Progress in 2022**

The Board of Commissioners understands that the progress of the Company is indirectly influenced by economic and industrial conditions. Throughout 2022, the global economy experienced a number of shocks that resulted in stalled economic growth and higher inflationary pressures compared to previous years. Based on data from the Central Statistics Agency (BPS), Indonesia's economy recorded stronger growth of 5.31% in 2022, higher than the

sebesar 5,31% di tahun 2022, lebih tinggi dibanding capaian tahun 2021 yang sebesar 3,70%. Sementara inflasi Indeks Harga Konsumen (IHK) pada bulan Desember 2022 tercatat menjadi 0,66% *month to month* (mtm), sehingga inflasi pada tahun 2022 menjadi 5,51% *year on year* (yoy), meningkat dibandingkan dengan inflasi IHK di 2021, sebesar 1,87% (yoy), hal ini terutama dipengaruhi oleh dampak penyesuaian harga bahan bakar minyak (BBM) bersubsidi pada bulan September 2022.

Di sisi lain, *demand* semen secara nasional di tahun 2022 mengalami kontraksi penurunan sebesar 3,3% dari periode yang sama tahun sebelumnya. Penurunan *demand* juga terjadi hampir di seluruh wilayah, yakni Pulau Sumatra (-5,7%), Pulau Jawa sebesar (-3,8%), Pulau Kalimantan (-0,2%), Pulau Sulawesi (-0,4%) dan Pulau Nusa Tenggara (-3,1%), sementara itu di wilayah Sumbagsel yang menjadi pasar basis Perusahaan turun sebesar 6,8% terhadap tahun lalu. Kondisi *oversupply* yang masih berlangsung hingga saat ini mengakibatkan terjadinya persaingan yang sangat ketat di industri semen nasional, sehingga utilisasi pabrik yang masih sangat rendah. Adapun pada tahun 2022, utilisasi pabrik tercatat sebesar 53% atau turun 3% dibanding tahun sebelumnya.

Menghadapi kondisi perekonomian yang belum stabil, Dewan Komisaris cukup mengapresiasi atas langkah-langkah inisiatif strategis yang diambil Perusahaan, yakni berupa *Strengthen Market Positioning* yang mengarah kepada penguatan *customer relation*, *Cost Leadership through SMBRGO45 Program* atau upaya efisiensi biaya di berbagai lini, dan *Competency Improvement of Employee* yang berfokus menciptakan *Human Capital* yang unggul dan profesional dengan mengembangkan sistem manajemen berbasis talenta.

### Penilaian Dewan Komisaris terhadap Kinerja Direksi atas Pengelolaan Perusahaan

Dalam memberikan penilaian atas kinerja Direksi dalam pengelolaan Perusahaan, Dewan Komisaris menggunakan dasar yang terukur. Dasar yang digunakan antara lain pencapaian target-target yang telah ditetapkan dalam Rencana Kerja dan Anggaran Perusahaan (RKAP) dan *Key Performance Indicators* (KPI) tahun 2022 baik yang bersifat kolegal (korporat) maupun individual yang telah disusun pada awal tahun dan telah disepakati dengan Pemegang Saham sebagai Kontrak Manajemen Direksi.

Selain tersebut diatas, penilaian juga dilakukan terhadap kinerja Direksi berdasarkan penerapan *Good Corporate Governance* (GCG). Hal ini sejalan dengan Surat Keputusan Sekretaris Menteri BUMN No. SK-16/S.MBU/2012 tanggal 06 Juni 2012 tentang Indikator/Parameter Penilaian dan Evaluasi atas Penerapan Tata Kelola Perusahaan yang Baik (*Good Corporate Governance*) pada Badan Usaha Milik Negara.

3.70% achievement in 2021. Meanwhile, the Consumer Price Index inflation in December 2022 was recorded at 0.66% month-to-month (mtm), so the inflation in 2022 was 5.51% year-on-year (yoy), an increase compared to the 1.87% (yoy) CPI inflation in 2021. This increase was mainly affected by the impact of the price adjustment of subsidized fuel oil (BBM) in September 2022.

On the other hand, in 2022, the national demand for cement experienced a contraction of 3.3% from the same period the previous year. This decline in demand occurred in almost all regions, including Sumatra Island (-5.7%), Java Island (-3.8%), Kalimantan Island (-0.2%), Sulawesi Island (-0.4%), and Nusa Tenggara Island (-3.1%). Meanwhile, in the Company's base market of South Sumatra, the demand fell by 6.8% compared to last year. The ongoing oversupply condition has resulted in tight competition in the national cement industry and very low plant utilization. As of 2022, plant utilization is recorded at 53%, which is a 3% decrease compared to the previous year.

Given the unstable economic conditions, the Board of Commissioners appreciates the strategic initiatives taken by the Company, which include strengthening market positioning to enhance customer relations, implementing the SMBRGO45 Program for cost efficiency in various fields to achieve cost leadership, and focusing on improving the competency of employees by creating a leading and professional Human Capital through a talent-based management system.

### Board of Commissioners' Assessment of Board of Directors' Performance on Company Management

To assess the performance of the Board of Directors in managing the Company, the Board of Commissioners uses measurable criteria, which includes achieving the targets set in the Company Work Plan and Budget (RKAP) and *Key Performance Indicators* (KPI) for 2022. These targets, both collective (corporate) and individual, are established at the beginning of the year and agreed upon with Shareholders Shares as part of the Directors' Management Contract.

Furthermore, the performance of the Board of Directors is also evaluated based on their implementation of *Good Corporate Governance* (GCG). This assessment is in accordance with the Decree of the Secretary of the Minister of SOEs No. SK-16/S.MBU/2012 dated June 06, 2012, which provides the indicators and parameters for evaluating the implementation of GCG in State-Owned Enterprises.

Sehubungan dengan penerapan GCG tersebut, antara lain ditunjukkan juga melalui rapat gabungan antara Dewan Komisaris dengan Direksi yang diselenggarakan secara rutin. Pada tahun 2022, jumlah rapat gabungan yang telah diselenggarakan sebanyak 25 kali. Pada kesempatan tersebut, Dewan Komisaris memberikan arahan dan masukan kepada Direksi terkait dengan hal-hal yang perlu mendapat perhatian dan ditindaklanjuti. Dewan Komisaris senantiasa melakukan pemantauan terhadap tindak lanjut dari hasil rapat tersebut.

Mengacu kepada pertimbangan-pertimbangan di atas, Dewan Komisaris memandang bahwa kinerja Direksi dalam pengelolaan Perusahaan pada tahun 2022 secara umum dapat dikatakan sangat baik. Dari sisi kinerja, pencapaian target-target Perusahaan lebih baik dibandingkan dengan periode tahun sebelumnya. Direksi dapat menyelaraskan target dengan sasaran sesuai dengan ruang lingkup tugas masing-masing Direksi. Sehingga dapat memenuhi target *Key Performance Indicators* (KPI), yang telah disetujui dalam Kontrak Manajemen.

Sepanjang tahun 2022, Perusahaan membukukan volume produksi semen sebesar 1.995.565 ton dan volume penjualan semen sebesar 2.008.860 ton. Dibandingkan dengan tahun sebelumnya masing-masing mengalami peningkatan sebesar 2% dan 4%.

Sedangkan dari sisi penerapan GCG, Dewan Komisaris menilai bahwa Direksi juga telah melaksanakannya dengan baik. Hal ini, antara lain terlihat dari pencapaian skor penilaian atas penerapan GCG yang meningkat menjadi 94,902 atau mencapai 94,90% pada tahun 2022 dengan predikat "Sangat Baik", dari tahun sebelumnya 93,85, serta skor *risk maturity* indeks naik menjadi 4,22 yang sebelumnya skor 3,46, dengan demikian mencerminkan pelaksanaan GCG dan Manajemen Risiko yang semakin baik, terencana dan konsisten.

Selain itu, pada tahun 2022 Dewan Komisaris juga memberikan perhatian penuh terhadap pencapaian KPI Perusahaan di tahun 2022 dengan indikator:

1. Nilai Ekonomi dan Sosial untuk Indonesia: dari sisi Finansial: yaitu Ekspansi berkesinambungan melalui pencapaian EBITDA, *Return on Invested Capital* (ROIC)  $\geq$  WACC, Posisi keuangan yang *sustainable*

To ensure the implementation of GCG, joint meetings are regularly held between the Board of Commissioners and the Board of Directors. In 2022, these joint meetings were held 25 times, during which the Board of Commissioners provided guidance and input to the Board of Directors on matters that required attention and follow-up. The Board of Commissioners also continuously monitors the follow-up of the meeting results.

With reference to the aforementioned considerations, the Board of Commissioners holds the view that the performance of the Board of Directors in managing the Company in 2022 can be described as excellent. The Company's achievements in terms of performance were better than the previous year's period. The Directors were able to align the targets with the objectives based on their respective duties. This enabled them to meet the *Key Performance Indicators* (KPI) targets, which were approved in the Management Contract.

Throughout 2022, the Company recorded cement production volume of 1,995,565 tons and cement sales volume of 2,008,860 tons. Compared to the previous year, there was an increase of 2% and 4% respectively.

Furthermore, the Company was able to increase its market share in the South Sumatra region by 3%, reaching 34% in 2022. Although there was a 4% decrease in the Company's market share in this region, it was compensated by the Lampung region's market share increase of 8%, and by 3% increases in Jambi and Bengkulu regions, as well as a 5% increase in the Bangka Belitung region, compared to the same period in the previous year

Additionally, the Company's risk maturity index score increased from 3.46 to 4.22, reflecting a more effective, planned, and consistent implementation of GCG and risk management

## Prospek Usaha dan Tantangan ke Depan

Dewan Komisaris telah mengevaluasi seluruh prospek usaha yang dituangkan Direksi dalam RKAP 2023. Direksi telah menyusun target utilisasi pabrik dan perolehan laba yang lebih tinggi di tahun 2023 dibandingkan dengan realisasi tahun 2022.

Dari hasil penelaahan, Dewan Komisaris berpandangan bahwa Direksi telah menyusun rencana strategi serta target usaha atau laba yang cukup optimistis. Penentuan prospek tersebut sejalan dengan proyeksi kondisi perekonomian nasional yang diperkirakan lebih baik dibandingkan tahun 2022. Asumsi lain yang digunakan oleh Direksi adalah potensi pertumbuhan permintaan semen seperti diproyeksikan oleh Asosiasi Semen Indonesia yang lebih tinggi 3% dari realisasi tahun 2022.

Selain kondisi ekonomi yang mulai pulih, target tersebut juga didukung oleh adanya program pemerintah untuk mempercepat penyelesaian pembangunan infrastruktur serta mempercepat pemulihan ekonomi pascapandemi COVID-19. Sehingga prioritas program kerja Pemerintah di tahun 2023 diutamakan pada 5 (lima) hal yaitu *multi years contracts*, pembayaran hutang pekerjaan, rehabilitasi dan rekonstruksi bencana alam, pembayaran eskalasi, serta tetap mempertahankan program pola padat karya.

Adapun alokasi anggaran jalan dan jembatan, pemukiman, serta perumahan untuk tahun 2023 sebesar Rp59,99 triliun. Peluang-peluang tersebut juga telah direspons oleh Direksi dengan menyusun strategi di antaranya penyesuaian rencana penjualan serta penyesuaian produksi untuk masing-masing produk Perusahaan.

Dewan Komisaris memandang bahwa Direksi telah menyertakan pertimbangan yang komprehensif dalam menentukan target usaha. Karena itu, Dewan Komisaris akan memberikan dukungan penuh kepada Direksi untuk mewujudkan target dan prospek usaha yang telah disusun sesuai dengan batasan wewenang, tugas dan fungsi yang melekat pada Dewan Komisaris.

## Business Prospects and Challenges Ahead

Board of Commissioners has evaluated all business prospects as outlined by the Directors in the 2023 RKAP. The Directors have set targets for factory utilization and higher profit in 2023 compared to the realization in 2022.

Based on the review results, the Board of Commissioners acknowledges that the Board of Directors has prepared a strategic plan and profit targets that are optimistic but achievable. These projections align with the expected improvement in national economic conditions in 2022, and the projected 3% increase in demand for cement as reported by the Indonesian Cement Association.

In addition to restoring economic conditions, this target is supported by a government program aimed at expediting the completion of infrastructure development and promoting economic recovery after the COVID-19 pandemic. As a result, the Ministry's work program priorities for 2023 are focused on five key areas: multi-year contracts, debt repayment, rehabilitation and reconstruction in areas affected by natural disasters, cost escalation payments, and the continuation of labor-intensive programs.

The budget allocation for roads, bridges, settlements, and housing in 2023 is IDR 59.99 trillion. The Board of Directors has responded to these opportunities by formulating strategies such as adjusting sales plans and production for each of the Company's products.

The Board of Commissioners recognizes that the Board of Directors has taken comprehensive considerations into account in setting business targets. As a result, the Board of Commissioners will fully support the Board of Directors in achieving the targets and business prospects that have been prepared within the limits of authority, duties, and functions assigned to the Board of Commissioners.

Proses bisnis yang bergerak dinamis, memang memerlukan kesiapan terutama dalam membaca kondisi yang ada. Hal ini berakibat pada tertahannya pertumbuhan ekonomi dan tekanan inflasi yang lebih tinggi dari tahun-tahun sebelumnya. Di sisi lain, stabilitas

The key strategic policies and initiatives of PT Semen Baturaja Tbk in 2022 include expanding Strengthen Market Position, achieving cost leadership through the SMBRGO45 Program, and improving employee competencies.

#### **Economic and Industry Review and the Company's Position in the Industry**

Throughout 2022, the global economy faced several shocks, resulting in a lower growth rate of 3.4% as per the IMF data in the January 2023 issue of the World Economic Outlook. This is lower than the growth rate of 5.7% recorded in 2021, leading to stagnant economic growth and higher inflationary pressures. Additionally, the stability of the national economy is also under pressure, despite several government initiatives

ekonomi nasional pun turut tertekan meskipun masih dapat dikendalikan dengan sejumlah inisiatif pemerintah untuk mendorong peningkatan konsumsi domestik.

Inflasi pada tahun 2022 berkisar di 5,51% year on year (yoy), meningkat dibandingkan dengan inflasi di tahun 2021 sebesar 1,87% (yoy). Kinerja positif tercermin melalui *Purchasing Manager's Index* (PMI) Manufaktur atau indeks manufaktur nasional pada Desember 2022 yang ditutup pada tingkat 50,9 dengan Indeks Harga Konsumen (IHK) sebesar 113,59 atau naik 0,6 poin dibandingkan bulan November yang menyentuh di angka 50,3. Produksi manufaktur Indonesia mengalami ekspansi pada kisaran lebih cepat pada bulan Desember 2022, didorong oleh kenaikan permintaan atas barang-barang produksi Indonesia.

Di tengah perlambatan ekonomi global tersebut, ekonomi Indonesia justru menguat dan tumbuh positif. Badan Pusat Statistik (BPS) mencatatkan pertumbuhan ekonomi Indonesia yang cukup mengesankan di tahun 2022, yakni mencapai 5,31% (yoy) dan tumbuh dibanding tahun sebelumnya. Kinerja pertumbuhan ekonomi dipengaruhi oleh faktor global dan domestik. Secara global, Indonesia diuntungkan dengan relatif tingginya harga komoditas ekspor unggulan di pasar global yang memberikan *windfall* dan mendorong kinerja ekspor serta surplus neraca perdagangan. Secara domestik, kombinasi aktivitas masyarakat yang semakin menggeliat dan bauran kebijakan fiskal dan moneter untuk menjaga daya beli mampu mendorong aktivitas ekonomi, baik dari sisi produksi maupun konsumsi.

Industri semen nasional di tahun 2022 masih belum menunjukkan perbaikan. Terlihat dari *demand* semen nasional di tahun 2022 yang justru mengalami penurunan sebesar 3,3% dari periode yang sama tahun sebelumnya. Penurunan *demand* juga terjadi di wilayah Sumbagsel sebesar 6,8% terhadap tahun lalu. Ditambah dengan kondisi *oversupply* yang masih berlangsung hingga saat ini serta ketatnya persaingan di industri semen nasional, khususnya wilayah Sumatra bagian Selatan (Sumbagsel) masih menjadi tantangan utama Perusahaan, belum lagi faktor tingginya biaya energi khususnya batubara yang juga menjadi salah satu komponen utama dalam harga pokok penjualan semen.

Kinerja Perusahaan di tahun 2022 berhasil menunjukkan pertumbuhan positif, di mana penjualan semen mencapai angka 2 Juta ton atau tumbuh 4% terhadap periode yang sama tahun sebelumnya. Pencapaian tersebut berdampak terhadap meningkatnya pendapatan usaha yang mencapai 7% dari periode tahun lalu atau mencapai Rp1,88 triliun dan Perolehan laba bersih Perusahaan positif di angka Rp94,83 miliar. Perusahaan pun berhasil menyelesaikan berbagai *milestone* penting, salah satunya adalah dengan bergabungnya Perusahaan menjadi bagian dari PT Semen Indonesia (Persero) Tbk atau SIG yang menjadi penutup dari integrasi Badan Usaha Milik Negara (BUMN) *sub* kluster semen yang digagas oleh Kementerian BUMN.

to encourage increased domestic consumption to keep it under control.

The inflation rate in 2022 increased to 5.51% year on year (yoy) compared to 1.87% (yoy) in 2021. However, there was a positive performance reflected in the Manufacturing Purchasing Manager's Index (PMI) or the national manufacturing index, which reached 50.9% in December 2022, along with a Consumer Price Index (CPI) of 113.59, representing a 0.6 point increase compared to November's figure of 50.3.

Despite the global economic slowdown, the Indonesian economy showed signs of strength and positive growth. The Central Statistics Agency (BPS) reported an impressive economic growth rate of 5.31% (yoy) in 2022, which was an increase from the previous year. The growth performance was influenced by both global and domestic factors. Globally, Indonesia benefited from the relatively high prices of its leading export commodities in global markets, which resulted in windfalls and boosted its export performance, leading to a trade surplus. Domestically, a combination of increasingly vibrant public activities and a mix of fiscal and monetary policies to maintain purchasing power stimulated economic activity, both in terms of production and consumption.

The national cement industry did not show any improvement in 2022. This was evident from the decreased national cement demand of 3.3% (yoy) from the same period the previous year, with a further decrease of 6.8% in the South Sumatra region. The main challenges faced by the Company were the on-going oversupply and intense competition in the national cement industry, particularly in the southern part of Sumatra (Sumbagsel), along with the high cost of energy, particularly coal, which is one of the major components in the cost of cement sold.

Despite the challenges faced, the Company's performance in 2022 showed positive growth, with cement sales reaching 2 million tons or growing by 4% compared to the same period the previous year. This achievement resulted in an increase in operating revenues, which reached 7% from the same period last year or IDR1.88 trillion, and a positive net profit of IDR94.83 billion. Moreover, the Company successfully completed various important milestones, including joining PT Semen Indonesia (Persero) Tbk or SIG, which marked the integration of the State-Owned Enterprises (SOE) cement sub-cluster initiated by the Ministry of SOE.

## Inisiatif Strategis Perusahaan Tahun 2022

Di tengah pertumbuhan ekonomi nasional pada tahun 2022, permintaan semen nasional justru tercatat turun 3,3% (yoy). Penurunan permintaan tersebut juga terjadi di Pulau Sumatra sebesar 5,7%, khususnya wilayah Sumbagsel sebesar 6,8%, yang menjadi wilayah pasar utama Perusahaan, dalam menghadapi kondisi dan berbagai tantangan di tahun 2022, Perusahaan menerapkan berbagai kebijakan strategis dalam rangka mencapai pertumbuhan kinerja, khususnya dari sisi operasional dan keuangan.

Adapun langkah-langkah strategis untuk meningkatkan penjualan yakni melalui penjualan via *e-commerce* dan aktivitas pemeliharaan *brand* dengan kegiatan *above the line* dan *below the line promotion*. Untuk meningkatkan pendapatan lainnya, Perusahaan tetap terus mengoptimalkan penjualan *white clay*. Pengembangan transaksi penjualan secara digital juga terus dilakukan melalui kerja sama dengan *platform e-commerce* Tokopedia dan *marketplace* Build.Id. Perusahaan juga tetap melakukan efisiensi dengan menerapkan pola distribusi yang paling efisien berupa pemilihan moda, kapasitas angkut dan asal semen serta mengurangi *double handling* dari pengeluaran semen di pabrik hingga kepada pelanggan (*least cost to serve*).

Dari sisi produksi, Perusahaan juga terus melakukan Implementasi *Plant Automation* Proses Produksi berbasis Industri 4.0 dengan menerapkan *Intelligence Process Control System* untuk mendorong perbaikan di sisi operasi serta untuk mendukung pencapaian *roadmap* INDI 4.0. Perusahaan juga melakukan pemenuhan gap skor INDI untuk memperbaiki pencapaian skor di tahun 2021.

Program efisiensi SMBRGO45 yang telah dimulai sejak tahun 2020 tetap dilakukan. Strategi ini merupakan langkah-langkah peningkatan pendapatan melalui pencapaian volume penjualan, *pricing strategy* yang diikuti dengan pengurangan biaya sebagai langkah efisiensi sehingga diperoleh titik impas (*break even point*) di utilisasi 45%. Hal yang dilakukan antara lain mengoptimalkan dan menyesuaikan stamformasi kereta api, pengoptimalan pemanfaatan *sludge oil*, *Spent Bleaching Earth* (SBE), kantong pecah, oli bekas, majun bekas dan *bad stock* dari industri lain sebagai bahan bakar alternatif, penurunan faktor terak, sentralisasi produksi semen di Pabrik Baturaja II, renegotiasi kontrak pengadaan barang, jasa, bahan baku, bahan bakar serta jasa angkutan dan jasa umum lainnya. Serta dilakukan pula pelaksanaan program SMBRGO3T dalam upaya efisiensi biaya tenaga kerja dan program peningkatan kompetensi karyawan menjadi bagian penting yang tetap dijalankan Perusahaan.

Dari sisi keuangan, sebagai upaya untuk meningkatkan pengelolaan kas dan modal kerja, Perusahaan juga telah melakukan percepatan pembayaran pokok Kredit Investasi (KI) sehingga mampu menurunkan beban bunga. Perusahaan juga meningkatkan kualitas piutang melalui penagihan intensif kepada piutang-piutang lama, *rescheduling* dan penambahan jaminan bagi distributor.

## Corporate Strategic Initiatives for 2022

Despite the national economic growth in 2022, the demand for national cement actually fell by 3.3% (yoy). The decrease in demand was also observed in Sumatra by 5.7%, particularly in the South Sumatra region, which is the Company's main market area, and experienced a decrease of 6.8%. To address these challenges, the company has implemented various strategic policies to achieve performance growth, especially in operations and finance.

The Company is taking a number of strategic steps to increase its sales and revenue, despite the challenging market conditions. One of the key initiatives is to focus on e-commerce sales and brand maintenance, through above the line and below the line promotion activities. The Company is also looking to optimize sales of white clay, which could provide an additional source of revenue. Additionally, the Company is working to develop digital sales transactions through partnerships with e-commerce platforms like Tokopedia and Build.Id. Finally, the Company is seeking to make its distribution operations more efficient by choosing the most efficient transport modes, reducing double handling, and optimizing the origin of cement. (Least cost to serve)

On the production side, the Company continues to implement Industry 4.0-based process automation at Plant 4.0 by deploying an intelligent process control system. This effort aims to drive operational improvements and support the Company's INDI 4.0 roadmap. Additionally, the Company is working to close the INDI score gap and improve its score achievement in 2021.

The SMBRGO45 efficiency program, which was initiated in 2020, is still being implemented. This strategy aims to increase revenue by achieving sales volume and adopting a pricing strategy while also reducing costs to achieve a break-even point at 45% utilization. To achieve this goal, several actions have been taken, such as optimizing and adjusting train formation, utilizing alternative fuels like sludge oil, Spent Bleaching Earth (SBE), broken bags, used oil, used rags, and bad stock from other industries, reducing the clinker factor, centralizing cement production at Baturaja II Plant, and renegotiating contracts for procurement of goods, services, raw materials, fuel, transportation services, and public services. The Company has also implemented the SMBRGO3T program to reduce labor costs and improve employee competency, which is a crucial part of its ongoing efforts.

From a financial standpoint, the Company has been striving to improve cash management and working capital. To reduce interest expenses, it has accelerated the payment of Investment Credit (IC) principal. In addition, the Company has focused on enhancing the quality of its receivables through intensive collection of old receivables, rescheduling payment plans, and adding collateral for distributors.

Tahun 2022, pencapaian KPI Korporat tahun 2022 sebesar 99,57% terhadap target hingga akhir tahun. Kinerja Perusahaan di bidang finansial masih belum mampu mencapai target yang telah ditetapkan sebagai dampak dari tidak tercapainya volume penjualan dan meningkatnya harga pokok penjualan. Namun, dengan konsistensi dalam implementasi program efisiensi SMBRGO45, di mana Perusahaan memberlakukan kebijakan efisiensi biaya produksi dan biaya usaha, mencakupi bahan baku, penunjang, logistik, pemasaran dan beban overhead maka pencapaian kinerja pada bidang finansial adalah sebagai berikut: *EBITDA* sebesar 93% dari RKAP 2022, *ROIC*  $\geq$  *WACC* masih negatif namun melebihi target dan mempunyai gap yang lebih kecil dibandingkan tahun sebelumnya sehingga mencapai persentase 110%, *Interest Bearing Debt to Invested Capital* mencapai 97% dari target, dan *Interest Bearing Debt to EBITDA* terealisasi 3,29 kali atau 103% dari target RKAP 2022.

Untuk kinerja operasional, indikator *Overall Equipment Effectiveness* (OEE) tercapai 100% dari target RKAP atau sebesar 84,60% mendekati angka *benchmark* untuk industri sejenis sebesar 85%. *Capacity utilization rate* sebesar 52% atau 96% dari target, belum mencapai target karena penyesuaian operasi pabrik terhadap permintaan semen yang dipengaruhi oleh dampak *oversupply* dan ketatnya persaingan. Walaupun demikian, pencapaian ini lebih baik dari tahun sebelumnya.

Untuk kinerja sosial, Perusahaan berkomitmen mewujudkan industri semen yang ramah lingkungan sesuai dengan visi Perusahaan, dengan berhasil menyerap bahan bakar alternatif (*Alternative Fuel & Raw Material*) untuk menggantikan kalori bahan bakar fosil (batubara) yang digunakan ditunjukkan dengan indikator *Thermal Substitution Rate* sebesar 2,62% atau melebihi target RKAP 2022 sebesar 1%.

Kinerja Perusahaan cukup baik pada kategori Inovasi Model Bisnis, di mana indikator Pertumbuhan Pendapatan Transaksi *Digital Platform* mencapai nilai maksimum 110% dari target RKAP. *Downstream business contribution to total revenue* mencapai 1,69% masih di bawah target RKAP 2022 sebesar 1,76%. Hal ini dikarenakan ketidaktercapaian target penjualan produk mortar pada tahun 2022.

Sedangkan untuk kategori Kepemimpinan Teknologi, proyek *Intelligence Process Control System* (IPCS) dan *Predictive Maintenance* Berbasis *Artificial Intelligence* (PMAI) berhasil diselesaikan sesuai dengan target waktu sehingga mampu mencapai nilai maksimum. Untuk kategori Peningkatan Investasi, realisasi investasi mencapai 51% di mana investasi difokuskan untuk pengembangan Perusahaan di masa mendatang serta menuju Industri 4.0 dan pembelian *spare part* untuk mendukung *keep operation* menyesuaikan dengan keperluan Perusahaan. Sementara skor *Risk Maturity Index* (RMI) sebesar 4,22 memenuhi predikat "*Transformed*" atau mampu melebihi target yang ditetapkan sebesar 3,96.

In 2022, the Corporate KPI achievement was 99.57% against the year-end target. However, the Company's financial performance failed to reach the set target due to lower sales volume and increased cost of goods sold. Nonetheless, the Company's consistency in implementing the SMBRGO45 efficiency program, which included cost-saving measures for production and operational expenses such as raw materials, support, logistics, marketing, and overhead costs, resulted in the following financial performance achievements: EBITDA was 93% of the 2022 RKAP target, although  $ROIC \geq WACC$  remained negative, it exceeded the target and had a smaller gap compared to the previous year, reaching 110%. Interest Bearing Debt to Invested Capital reached 97% of the target, and Interest Bearing Debt to EBITDA was realized at 3.29 times or 103% of the 2022 RKAP target.

The Overall Equipment Effectiveness (OEE) indicator achieved 100% of the RKAP target, equivalent to 84.60%, which is close to the benchmark figure for similar industries of 85%. However, the capacity utilization rate was only 52%, falling short of the target but reaching 96% of it. This was due to the adjustment of Plant operations to cement demand, which was impacted by oversupply and tight competition. Nonetheless, this achievement was better than the previous year.

As part of the Company's vision to realize an environmentally friendly cement industry, it has committed to successfully absorbing alternative fuels (Alternative Fuel & Raw Materials) to replace the calories of fossil fuels (coal). This is reflected in the achievement of the Thermal Substitution Rate indicator, which reached 2.62%, exceeding the 2022 RKAP target of 1%.

The Company's performance in the Business Model Innovation category was satisfactory, as demonstrated by the achievement of the Digital Platform Transaction Revenue Growth indicator, which reached a maximum of 110% of the RKAP target. However, the downstream business contribution to total revenue only reached 1.69%, still falling short of the 2022 RKAP target of 1.76%. This was due to the unachieved sales target for mortar products in 2022.

In the Technology Leadership category, the Company successfully completed the Intelligence Process Control System (IPCS) and Artificial Intelligence-Based Predictive Maintenance (PMAI) projects within the designated timeframe, achieving maximum scores. In the Investment Energize category, the Company was able to realize 51% of its investment plan, focusing on developing its future capabilities and transitioning towards Industry 4.0, as well as purchasing spare parts to support its operations according to its needs. Moreover, the Risk Maturity Index (RMI) score of 4.22 exceeded the target set at 3.96, earning the title of "*Transformed*" or indicating the Company's ability to effectively manage risks.

Untuk kategori Pengembangan Talenta, milenial dalam *nominated talent* terealisasi 3 orang dari *nominated talent* 10 orang dan perempuan *nominated talent* 1 orang sesuai target. Terakhir, indikator implementasi/penyusunan kebijakan terkait *Talent Development & Career Path System* di lingkup *holding* atau klaster mencapai target 50% atau 100% dari rencana.

In 2022, the Company's profit for the year was IDR94.83 billion, an increase of IDR48.12 billion or 103.03%, compared to the previous year's IDR46.71 billion. This increase was due to an increase in revenue and a decrease in financial expenses. The total revenue reached IDR1,881.77 billion, which is equivalent to 94.95% of the target of IDR1,981.89 billion. The net profit for the year amounted to IDR94.83 billion, which is 94.63% of the target of IDR100.21 billion. This was primarily due to the efficiencies achieved in the Company's production and operational costs, as well as the decrease in Investment Loan interest resulting from the Company making an early Repayment of IDR238 billion.

The Company's capital structure in 2022 showed that its total assets amounted to IDR5,211.25 billion, which is 88.16% of the target of IDR5,911.11 billion. On the other hand, the total liabilities of the Company, which amounted to IDR2,124.33 billion in 2022, were recorded at 90.70% of the target of IDR2,342.14 billion. The decrease in total equity was mainly due to an increase in the allowance for impairment losses.

## Kendala dan Tantangan, serta Solusi yang Diterapkan Perusahaan

Secara umum Perusahaan menghadapi berbagai kendala dan tantangan dalam menjalankan operasionalnya selama tahun 2022, terutama dipengaruhi oleh faktor eksternal yang berdampak pada industri semen secara keseluruhan seperti yang telah diuraikan pada bagian kondisi makroekonomi dan *demand* semen sebelumnya.

### 1. Oversupply Berkelanjutan

Dengan estimasi utilisasi semen Nasional tahun 2022 berkisar 53% terhadap konsumsi semen dan semakin ketatnya persaingan, Perusahaan berupaya meningkatkan penjualan produk turunan, penjualan via *platform digital* dan efisiensi di seluruh lini.

### 2. Kenaikan Biaya Logistik

Kenaikan harga BBM Industri dan rencana penerapan kebijakan Zero ODOL pada awal tahun 2023 merupakan tantangan bagi Perusahaan. Perusahaan tetap mematuhi semua regulasi dan optimalisasi pola distribusi melalui pemilihan moda, kapasitas angkut dan sumber produk serta mengurangi *double handling* dalam menjaga biaya operasional perusahaan tetap baik.

### 3. Tren Kenaikan Harga Bahan Bakar (Batubara & BBM)

Tren harga batubara dan minyak dunia masih menunjukkan kenaikan kemudian diikuti keterbatasan stok batubara serta kebijakan pengurangan subsidi BBM dari Pemerintah. Pemberlakuan aturan *Domestic Market Obligation* (DMO), geografis Perusahaan yang berada dekat dengan sumber tambang dan formulasi kontrak yang telah mengikat dengan PTBA menyebabkan harga perolehan batubara Perusahaan lebih baik dibandingkan pabrik semen pesaing lainnya. Namun, Perusahaan tetap melakukan efisiensi untuk menekan biaya produksi.

### 4. Pajak Karbon

Sebagai langkah antisipasi rencana Pemerintah menerapkan pajak karbon di tahun 2025, Perusahaan menggunakan bahan bakar alternatif dan material substitusi (AFR) serta menurunkan faktor terak, selain itu Perusahaan juga dalam proses perencanaan pembangunan Pembangkit Listrik Tenaga Surya (PLTS) sebagai upaya efisiensi energi yang ramah lingkungan yang saat ini progresnya dalam tahapan perizinan dan engineering.

## Analisis Prospek Usaha Tahun 2023

Asosiasi Semen Indonesia memperkirakan tingkat permintaan semen pada tahun 2023 akan meningkat sekitar 4% dari tahun 2022. Proyeksi tersebut didukung oleh pertumbuhan ekonomi yang akan semakin menguat dan adanya alokasi anggaran infrastruktur di tahun 2023 dari Pemerintah sebesar Rp392 triliun atau meningkat 5% dari tahun 2022.

Pada akhir tahun 2022, Perusahaan juga telah resmi bergabung dengan Semen Indonesia (SIG) untuk mendukung penciptaan sinergi klaster semen BUMN. Dengan kondisi yang sangat strategis ini, pada tahun 2023, Perusahaan diharapkan akan mampu mencapai target kinerja yang jauh lebih baik dibandingkan tahun 2022.

## Obstacles and Challenges, as well as Solutions Implemented by the Company

In general, the Company faces various obstacles and challenges in carrying out its operations during 2022, mainly influenced by external factors that have an impact on the cement industry as a whole, as described in the previous section on macroeconomic conditions and cement demand.

### 1. Continuous Oversupply

As the national cement utilization rate is estimated to be around 53% for 2022 and competition grows increasingly intense, the Company aims to boost sales of derivative products and increase sales through digital platforms, while also striving to improve efficiency across all its operations.

### 2. Increase in Logistics Costs

The Company is facing a challenge with the rise in industrial fuel prices and the implementation of the Zero ODOL policy in early 2023. Nonetheless, the Company remains committed to complying with all regulations and optimizing distribution patterns by selecting appropriate modes of transport, managing transport capacities and sources of products, and reducing double handling to keep operational costs under control.

### 3. Trends in Increasing Fuel Prices (Coal & Fuel)

The global trend of increasing coal and oil prices, coupled with limited coal stocks and the Government's policy of reducing fuel subsidies, has resulted in challenges for the Company. Despite this, the Company benefits from the Domestic Market Obligation (DMO) regulations, its proximity to mining sources, and a binding contract with PTBA, resulting in a better acquisition price for coal compared to other competing cement plants. However, the Company remains committed to improving efficiencies and reducing production costs.

### 4. Carbon Tax

In preparation for the government's upcoming implementation of a carbon tax in 2025, our company is taking various steps to comply. These include utilizing alternative fuels and raw materials (AFR) and reducing the clinker factor. As part of our commitment to improving energy efficiency and reducing our environmental impact, we are also constructing a Solar Power Plant (PLTS).

Regulation No. PER-01/MBU/2011 on the Implementation of Good Corporate Governance. The implementation of risk management in the Company's refers to the risk management guidelines and SOPs that have been published to serve as guidelines for managing the risks faced.

In 2022, the Company assessed the maturity level of its risk management implementation, which consists of five measurement components: governance, planning, implementation stages, monitoring and evaluation, and risk culture. Based on the assessment results, the company achieved a score of 4.22 out of a maximum of 5, earning the title of *Transformed*.

The results of these measurements suggest that the Company is beginning to reflect a risk-aware culture. One of the main positive factors that has increased the maturity level of the Company's risk management implementation is the substantial mitigation measures taken for performance risk and financial soundness level risks, primarily through efficiency measures, expansion of marketing efforts, bad debt collection, and consistent work safety programs. However, to continue improving the risk culture, consistent support from the Board of Directors and consultation from the Risk Management work unit are necessary to guide risk owners.

The Company conducts constant evaluations of its implemented Risk Management System to assess its maturity level. As of December 31, 2022, the implementation of Risk Management within the company has been running properly. However, the company still needs to develop a consistent dissemination plan for risk management implementation, build a comprehensive risk management system, implement follow-up on the recommendations based on the Risk Maturity Level assessment, and finalize the Draft Business Continuity Management (BCM) Guidelines. These efforts are expected to enhance the effectiveness of the Risk Management system.

In 2022, the Company conducted a comprehensive preparation of business processes in each work unit related to monitoring the Risk Profile. This involved going through the stages of the risk monitoring process, followed by continuous communication and coordination to ensure the effectiveness of the implementation of risk mitigation (follow-up) according to the established plan. These efforts are aimed at minimizing and controlling the potential risks of the Company.

Sementara lokasi penggilingan dan pengantongan semen terletak di Pabrik Baturaja, Pabrik Palembang dan Pabrik Panjang. Bahan baku produk semen Perusahaan berupa batu kapur dan tanah liat yang didapatkan dari lokasi pertambangan batu kapur dan tanah liat milik Perusahaan yang berlokasi sekitar 1,2 km dari pabrik di Baturaja. Seiring dengan perkembangan usahanya, Perusahaan meningkatkan kapasitas terpasang hingga 500.000 ton semen per tahun melalui investasi peralatan pada tahun 1992. Di saat yang sama, Perusahaan juga menjalankan Proyek Optimalisasi I (OPT I) dengan masa pembangunan selama 2 (dua) tahun, sehingga kapasitas terpasang menjadi 550.000 ton semen per tahun.

Keberhasilan OPT I memberikan banyak kemajuan dan masukan untuk eskalasi bisnis Perusahaan. Untuk itu, pada tahun 1996, Perusahaan melaksanakan proyek lanjutan Optimalisasi II (OPT II) dengan target peningkatan kapasitas sebesar 1,25 juta ton semen per tahun. OPT II berhasil diselesaikan pada tahun 2001 dan terus aktif memproduksi hingga saat ini.

Perusahaan terus melakukan pengembangan organisasi dan visi strategis, yang berujung pada diterbitkannya obligasi I senilai Rp200 miliar. Kewajiban melunasi pinjaman untuk pelaksanaan obligasi ini telah dilunasi pada Juni 2010. Emisi obligasi ini berhasil menjadi batu loncatan restrukturisasi keuangan secara keseluruhan sehingga Perusahaan dapat meningkatkan profitabilitas dan likuiditasnya. Berdasarkan kondisi tersebut, Perusahaan meraih kepercayaan untuk menggarap proyek-proyek besar dan prestisius. Selain itu, Perusahaan juga kembali menambah kapasitas produksi melalui proyek *Cement Mill* dan *Packer* dengan kapasitas 750.000 ton per tahun, pada 2011, dan beroperasi secara komersil pada Juli 2013, sehingga kapasitas terpasang Perusahaan mencapai 2 juta ton per tahun.

Aksi korporasi tersebut, sekaligus mengubah status Perusahaan dari PT Semen Baturaja (Persero) menjadi PT Semen Baturaja (Persero) Tbk.

Perusahaan menggunakan dana hasil penawaran umum untuk membangun pabrik Baturaja II dengan kapasitas 1,85 juta ton semen tiap tahunnya. Berdasarkan peningkatan

the cement milling and packing locations are situated at the Baturaja Plant, Palembang Plant, and Panjang Plant. The raw materials for the Company's cement products, namely limestone and clay, are obtained from the Company's limestone and clay mining sites located approximately 1.2 km from the factory in Baturaja. As the Company's business developed, it invested in equipment in 1992 to increase its installed capacity to 500,000 tons of cement per year. At the same time, the Company also carried out the Optimization I Project (OPT I) with a construction period of 2 (two) years, resulting in an increase in the installed capacity to 550,000 tons of cement per year.

The success of OPT I brought significant progress and insights for the Company's business expansion. Consequently, in 1996, the Company launched the follow-up project, Optimization II (OPT II), with the goal of increasing the capacity by 1.25 million tons of cement per year. OPT II was completed successfully in 2001 and is still actively producing today.

The Company continued to develop its organization and strategic vision, which led to the issuance of bonds worth IDR 200 billion. The loan obligation for the implementation of this bond was repaid in June 2010. The successful issuance of this bond became a stepping stone for the overall financial restructuring, which enabled the Company to increase its profitability and liquidity. As a result, the Company gained trust to carry out major and prestigious projects. Moreover, in 2011, the Company added production capacity through the Cement Mill and Packer project, which had a capacity of 750,000 tons per year. The project started commercial operations in July 2013, and the Company's installed capacity reached 2 million tons per year.

In 2013, along with the Company's business development, a corporate action was carried out, namely an initial public offering (IPO). This action received an extraordinary response amidst the Company's vibrant growth performance. On June 28, 2013, during the IPO, 23.76% or 2,337,678,500 shares of the Company were officially traded on the Indonesia Stock Exchange (IDX) with the stock code SMBR. Additionally, this corporate action changed the status of the company from PT Semen Baturaja (Persero) to PT Semen Baturaja (Persero) Tbk.

### Baturaja Mortar

Mortar Cement, also known as Baturaja Mortar, is the Company's instant cement product formulated for specific functions and uses. Using Baturaja Mortar is very easy because it does not require any additional materials; you simply mix the cement with adequate water and apply it directly. This instant cement can be used as an alternative building material to replace the conventional cement-sand mix. The advantage of using this mortar is its thin application, making it more efficient to use, along with the use of special additives to improve its quality.

Baturaja Mortar has many advantageous qualities, as it is practical, of good quality, and efficient. Baturaja Mortar consists of five variants, including ceramic adhesion, brick and plaster couple, light brick couple, grey cladding, and white cladding, which are all available in 40 and 25-kilogram sacks.

1. The ceramic-adhesive mortar is an instant adhesive type of cement used for ceramic, granite, marble, mosaic, and natural stone on floors and walls. This type of mortar has a strong adhesive quality, is practical, efficient, and can be applied to coarse surfaces.
2. The brick and plaster couple mortar is an instant adhesive cement used to install red bricks and plaster on brick or concrete walls. This type of mortar has a strong adhesive quality, is practical, efficient, and cladding can be applied after 5 hours of its application.
3. The light brick couple mortar is an instant adhesive cement used to install light bricks. This type of mortar has a strong adhesive quality, is practical, efficient, and plaster can be applied after 24 hours of its application.
4. The cladding mortar is an instant cement used for plastered or concrete wall surfaces and is suitable for indoor purposes. This type of cement results in smooth

menghasilkan acian yang halus, mencegah adanya retak rambut, memiliki daya rekat yang baik, praktis, hemat, efisien dan dapat langsung di cat setelah 24 jam.

5. Mortar acian putih merupakan jenis semen acian instan untuk permukaan dinding plester, konkret serta dapat diaplikasikan untuk keperluan indoor maupun outdoor. Mortar acian putih menghasilkan acian yang halus, mencegah adanya retak rambut, memiliki daya rekat yang baik, praktis, hemat, efisien dan dapat langsung dicat setelah 24 jam.

| Raw Mill                                                           | <p>Batu kapur dan tanah liat yang ada di <i>stock pile</i>, kemudian dimasukkan ke dalam <i>raw mill</i> ditambahkan pasir besi dan pasir silika untuk digiling dan dikeringkan menjadi <i>raw meal</i>. <i>Raw meal</i> atau tepung baku adalah bahan baku untuk pembuatan terak (<i>clinker</i>). <i>Raw meal</i> memiliki tekstur seperti <i>powder</i> yang fisiknya mempunyai kehalusan tertentu. <i>Raw meal</i> mempunyai sifat fisika dan sifat kimia tertentu yang dijadikan parameter kontrol kualitas produk. Sifat kimia digunakan sebagai pengatur proporsi bahan-bahan yang diumpankan ke dalam proses. <i>Raw meal</i> dihasilkan dari sebuah sistem peralatan yaitu <i>raw mill plant</i> yang terdiri dari alat-alat utama, sistem transportasi dan alat-alat separasi untuk kemudian disimpan di <i>raw meal silo</i>.</p> <p>After being retrieved from the stockpile, the limestone and clay are mixed with iron sand and silica sand and transferred to the raw mill for drying and milling, resulting in raw meal. Raw meal is a powdered material used in the manufacturing of clinker and has a smooth texture. Its physical and chemical properties are essential quality control parameters. The chemical properties are used to regulate the proportion of materials fed into the process. The Raw Mill Plant equipment system, which includes the main equipment, transport system, and separation tools, produces the raw meal that is then stored in the raw meal silo.</p> |
| Pemanasan dan Pembakaran ( <i>Kiln</i> )<br>Heating and Combustion | <p><i>Raw meal</i> yang sudah jadi dan disimpan dalam CF Silo digunakan sebagai umpan <i>kiln</i> (<i>kiln feed</i>) yang mengalami beberapa tahap proses sebelum akhirnya menjadi terak, yakni melalui sistem pendinginan dan alat transportasi untuk disimpan di silo terak. Dalam tahap ini, terjadi proses pembakaran yang menggunakan bahan bakar batu bara, yang telah digiling dan dikeringkan melalui <i>coal mill</i>. Sebagian terak digunakan oleh <i>cement mill</i> Baturaja dan juga <i>cement mill</i> di Palembang dan Panjang. Terak untuk <i>Cement mill</i> di Palembang diangkut dengan kereta api dan truk sedangkan terak untuk <i>cement mill</i> di Panjang menggunakan angkutan <i>truck</i> dan kereta untuk diproses menjadi semen curah.</p> <p>The raw meal produced and stored in the CF Silo serves as kiln feed, which undergoes several stages of processing before becoming clinker. The clinker is then cooled, transported, and stored in the clinker silo. At this stage, a combustion process takes place using milled and dried coal fuel. The Baturaja, Palembang, and Panjang cement mills use a portion of the resulting clinker. The cement mill in Palembang is transported by train and trucks, while the cement mill in Panjang is transported by train and trucks for processing into bulk cement.</p>                                                                                                                                                     |

Material ini bersama-sama diumpungkan ke <i>cement mill</i> kemudian mengalami proses penggilingan dengan produk akhir berupa semen OPC Tipe I dan PCC. Sementara itu, untuk memproduksi jenis OPC tipe II dan OPC tipe V, terak hanya digiling dengan <i>gypsum</i>. Setelah didapat semen yang berkualitas maka semen tersebut disimpan melalui silo semen kemudian dipindahkan ke bin semen melalui <i>air slide</i>, <i>belt conveyor</i>, dan <i>vibrating screen</i>. Keluaran dari silo semen berupa semen curah, yang sebagian dijual dalam bentuk semen curah dengan alat transportasi berupa mobil kapsul dan gerbong kereta kapsul ke Palembang, Baturaja, dan Lampung dan sebagian dikemas di <i>Packing Plant</i>. The clinker, which is transported from the Clinker Silo in Baturaja, is ground in the cement mill by adding <i>gypsum</i> and a third material. This third material is fed simultaneously into the cement mill for the grinding process until the final product, OPC cement Type I and PCC, is achieved. For the production of OPC Type II and OPC Type V, the clinker is only milled with <i>gypsum</i>. Once high-quality cement is obtained, it is stored in a cement silo and transferred to the cement bin through an air slide, conveyor belt, and vibrating screen. The output from the cement silos is in the form of bulk cement, which is partially sold in mobile-capsule and carriage-capsule transport (isotank) to Palembang, Baturaja, and Lampung, and partially packed at the Packing Plant.</p> |

# TINJAUAN PEREKONOMIAN DAN INDUSTRI

## ECONOMIC AND INDUSTRIAL REVIEW

### ANALISIS PEREKONOMIAN GLOBAL DAN NASIONAL

Sepanjang tahun 2022, perekonomian global masih dihadapkan oleh berbagai tantangan, salah satunya adalah ketegangan geopolitik dunia akibat konflik Rusia-Ukraina, yang memperburuk fragmentasi dan prospek ekonomi global. Kondisi tersebut berdampak pada pelemahan transaksi perdagangan, kenaikan harga komoditas, dan ketidakpastian pasar keuangan global, yang menyebabkan koreksi prakiraan pertumbuhan ekonomi secara global.

Lembaga Dana Moneter Internasional (*International Monetary Fund/IMF*) dalam laporan *World Economic Outlook* yang dirilis pada Januari 2023, memprediksi pertumbuhan ekonomi global berada pada kisaran 3,4% atau turun signifikan dari pertumbuhan ekonomi global tahun 2021 yang tercatat sebesar 6,2%. Bahkan sejumlah Lembaga internasional memproyeksikan bahwa kondisi ini masih akan terus berlanjut dan diprediksi pertumbuhan perekonomian dunia di tahun 2023 akan lebih rendah dari perkiraan sebelumnya.

Di tengah perlambatan pertumbuhan ekonomi global, Badan Pusat Statistik (BPS) mencatat, kondisi ekonomi Indonesia di tahun 2022 justru tumbuh sebesar 5,31% (yoy), lebih tinggi dibandingkan tahun 2021 yang mengalami pertumbuhan

### GLOBAL AND NATIONAL ECONOMIC ANALYSIS

The global economy faced several challenges throughout 2022, including geopolitical tensions due to the Russia-Ukraine conflict, which exacerbated fragmentation and posed risks to the global economy. These conditions weakened trade transactions, led to rising commodity prices, and increased uncertainty in global financial markets, resulting in downward revisions to forecasts for global economic growth.

According to the World Economic Outlook report released by the International Monetary Fund (IMF) in January 2023, global economic growth is predicted to be around 3.4%, which represents a significant decrease from the 6.2% growth recorded in 2021. Many international institutions project that this trend will continue, and it is anticipated that global economic growth in 2023 will be lower than previously estimated.

In the midst of a slowdown in global economic growth, the Central Statistics Agency (BPS) noted that Indonesia's economic conditions in 2022 actually grew by 5.31% (yoy), which is higher than the growth of 3.70% experienced in

sebesar 3,70% di tengah pertumbuhan ekonomi global yang dalam tren melambat. Perekonomian nasional yang kuat didukung oleh hampir seluruh komponen PDB dari sisi pengeluaran.

Bank Indonesia (BI) memproyeksikan pertumbuhan ekonomi nasional di tahun 2023, diperkirakan tetap kuat pada kisaran 4,5-5,3%, hal itu didorong oleh peningkatan permintaan domestik, baik konsumsi rumah tangga maupun investasi. Prakiraan tersebut sejalan dengan naiknya mobilitas masyarakat pasca penghapusan kebijakan Pemberlakuan Pembatasan Kegiatan Masyarakat (PPKM), membaiknya prospek bisnis, meningkatnya aliran masuk Penanaman Modal Asing (PMA), serta berlanjutnya penyelesaian Proyek Strategis Nasional (PSN).

Berdasarkan data BPS secara tahunan (yoy), terjadi inflasi sebesar 5,51%. Sementara secara bulanan (mtm), terjadi inflasi sebesar 0,66%. Penyumbang utama inflasi tahunan di antaranya adalah komoditas bensin, bahan bakar rumah tangga, dan tarif angkutan udara dengan andil masing-masing sebesar 1,15%, 0,30% dan 0,27%.

2021, despite the global economic conditions. A strong national economy is supported by almost all components of GDP from the expenditure side, despite the slowing trend in economic growth.

Bank Indonesia (BI) projects a strong national economic growth for 2023, expected to be in the range of 4.5-5.3%, driven by increased domestic demand in both household consumption and investment. This prediction is supported by the increase in community mobility after the abolition of the Imposition of Restrictions on Community Activities (PPKM) policy, improved business prospects, increased inflows of Foreign Investment (PMA), and the ongoing completion of National Strategic Projects (PSN).

According to BPS data, there was an annual inflation of 5.51%, while on a monthly basis (mtm), inflation was 0.66%. The main contributors to the annual inflation were gasoline, household fuels, and airfares, with a share of 1.15%, 0.30%, and 0.27%, respectively.

## ANALISIS INDUSTRI DAN POSISI PERUSAHAAN DALAM INDUSTRI

Di sisi lain, industri semen nasional hingga akhir tahun 2022 masih mengalami penurunan permintaan (*demand*). Asosiasi Semen Indonesia (ASI) menyebutkan *demand* semen nasional di tahun 2022 mengalami penurunan sebesar 3,3% dari periode yang sama tahun sebelumnya. Penurunan *demand* juga terjadi di wilayah Sumbagsel sebesar 6,8% terhadap tahun lalu meskipun *demand* di wilayah Sumatra Selatan yang menjadi pasar basis Perusahaan meningkat 2,6%. Di samping penurunan permintaan dan persaingan di industri semen yang semakin kompetitif, produsen semen di Indonesia juga dihadapkan dengan kenaikan harga energi seperti batubara yang terjadi di sepanjang tahun 2022 yang menjadi salah satu komponen utama dalam harga pokok penjualan semen.

Meski demikian, kinerja Perusahaan tahun 2022 tetap menunjukkan pertumbuhan positif, di mana penjualan semen mencapai angka 2 juta ton atau tumbuh 4% terhadap periode yang sama tahun sebelumnya. Pencapaian tersebut berdampak terhadap meningkatnya pendapatan usaha yang mencapai 7% dari periode tahun lalu atau mencapai Rp1,88 triliun. Perolehan laba bersih Perusahaan pun positif, yakni di angka Rp95 miliar.

## INDUSTRY ANALYSIS AND COMPANY POSITION IN INDUSTRY

Meanwhile, the national cement industry experienced a decrease in demand until the end of 2022. According to the Indonesian Cement Association (ASI), national cement demand in 2022 decreased by 3.3% compared to the same period in the previous year. The South Sumatra region also experienced a decline in demand by 6.8% compared to last year, despite an increase of 2.6% in the Company's base market. In addition to declining demand and increasing competition in the cement industry, cement producers in Indonesia are also facing the challenge of rising energy prices, such as coal, which will be one of the main components in the cost of cement sold throughout 2022.

Despite the challenges faced by the cement industry, the Company's performance in 2022 continued to show positive growth. Cement sales reached 2 million tons, representing a 4% growth compared to the same period in the previous year. This achievement resulted in a 7% increase in revenue compared to the previous year, reaching IDR1.88 trillion. The company also achieved a positive net profit of IDR95 billion.

Additionally, through its subsidiary PT Baturaja Multi Usaha (BMU), the Company engages in cement distribution and transportation. The products and services produced by the Company and its subsidiaries are a consolidated source of income for the Company and are presented in the financial information as one of the benchmarks for management to evaluate performance.

Meanwhile, the Company is currently developing two products: porous concrete and fiber cement board (FCB). Porous concrete is useful as a surface covering for pedestrian paths and park areas due to its ability to absorb water and high porosity. It is composed of cement, water, coarse aggregate, and fine aggregate. On the other hand, FCB is useful for partition walls, floors, and ceilings, as it is lighter, resistant to water, termites, and fire, and has high flexural strength and easy installation. Its raw materials consist of cement, silica sand, and additives.

#### 4. Peningkatan Investasi

Pelaksanaan investasi tahun 2022 yang terdiri dari investasi pengembangan dan investasi rutin dalam rangka mendukung inisiatif strategis yang terdiri dari percepatan pengurusan persiapan operasi tambang, pengembangan fasilitas bangunan pabrik, optimalisasi dan efisiensi pabrik, pengembangan *distribution center*, pembangunan kantor pusat serta penyediaan kebutuhan *spare part* untuk mendukung kelancaran pabrik.

#### 5. Pengembangan Talenta

Melakukan pengembangan *talent pool*, penerapan transformasi menuju budaya *unified performance driven*, langkah pengembangan sistem manajemen talenta, peranan talenta penyandang disabilitas, pelayanan umum dan Inisiatif #SMBRGO3T yang merupakan rencana peningkatan produktivitas tenaga kerja.

Di tengah upaya dalam mengembangkan segmen usaha untuk meningkatkan kinerja di tahun 2022, terdapat beberapa tantangan yang dihadapi oleh Perusahaan. Adapun tantangan yang dihadapi di tengah upaya Perusahaan dalam melakukan pengembangan segmen usaha untuk meningkatkan kinerja, dan upaya yang dilakukan Perusahaan dalam menghadapi tantangan tersebut, adalah sebagaimana terlampir berikut ini.

##### 1. Oversupply Berkelanjutan

Dengan estimasi utilisasi semen Nasional tahun 2022 berkisar 53% terhadap konsumsi semen dan semakin ketatnya persaingan, Perusahaan berupaya meningkatkan penjualan produk turunan, penjualan via *platform digital* dan efisiensi di seluruh lini.

##### 2. Kenaikan Biaya Logistik

Kenaikan harga BBM Industri dan rencana penerapan kebijakan Zero ODOL pada awal tahun 2023 merupakan tantangan bagi Perusahaan. Namun, Perusahaan tetap berupaya mematuhi semua regulasi dan optimalisasi pola distribusi melalui pemilihan moda, kapasitas angkut dan sumber produk serta mengurangi *double handling* dalam menjaga biaya operasional perusahaan tetap baik.

##### 3. Tren Kenaikan Harga Bahan Bakar (Batubara & BBM)

Tren harga batubara dan minyak dunia masih menunjukkan kenaikan kemudian diikuti keterbatasan stok batubara serta kebijakan pengurangan subsidi BBM dari Pemerintah. Pemberlakuan aturan *Domestic Market Obligation (DMO)*, geografis perusahaan yang berada dekat dengan sumber tambang dan formulasi kontrak yang telah mengikat dengan PTBA menyebabkan harga perolehan batubara Perusahaan lebih baik dibandingkan pabrik semen pesaing lainnya. Namun, Perusahaan tetap melakukan efisiensi untuk menekan biaya produksi.

##### 4. Pajak Karbon

Sebagai langkah antisipasi rencana pemerintah menerapkan pajak karbon di tahun 2025, SMBR menggunakan bahan bakar Alternatif dan Material Substitusi (AFR) serta menurunkan faktor terak, selain itu Perusahaan juga dalam proses perencanaan pembangunan Pembangkit Listrik Tenaga Surya (PLTS) sebagai upaya efisiensi energi yang ramah lingkungan yang saat ini progresnya dalam tahapan perizinan dan engineering.

#### 4. Investment Energize

The Company will implement investment in 2022, including development investment and routine investment, to support strategic initiatives. This will involve accelerating the preparation of mine operations, developing factory building facilities, optimizing and improving factory efficiency, developing distribution centers, constructing head offices, and providing spare parts to support smooth factory operations.

#### 5. Talent Development

The Company will focus on talent pool development, implementing a transformation towards a unified, performance-driven culture, developing a talent management system, and promoting the role of talents for persons with disabilities, public services, and the #SMBRGO3T initiative to increase manpower productivity.

Despite the Company's efforts to improve performance in 2022 through business segment development, several challenges are being faced. The challenges and the Company's response to them are as follows:

##### 1. Continuous Oversupply

The estimated national cement utilization rate of around 53% for cement consumption in 2022, combined with intense competition, poses a challenge for the Company. To address this, the Company aims to increase sales of derivative products, utilize digital platforms for sales, and improve efficiency across all lines.

##### 2. Increase in Logistics Costs

The increase in industrial fuel prices and the upcoming implementation of the Zero ODOL policy in early 2023 pose a challenge for the Company. However, the Company is working to comply with all regulations and optimize distribution patterns by selecting modes, transport capacities, and product sources, as well as reducing double handling to maintain operational costs.

##### 3. Trend of Increase in Fuel Prices (Coal & Fuel)

The trend of world coal and oil prices continues to rise, accompanied by limited coal stocks and a reduction in fuel subsidies by the Government. However, the Company has benefited from the application of Domestic Market Obligation (DMO) regulations, its close proximity to the mining source, and a binding contract with PTBA, resulting in a better acquisition price for the Company's coal compared to other cement factories. Nevertheless, the Company continues to implement cost-reduction measures to improve production efficiency.

##### 4. Carbon Tax

In anticipation of the government's plan to implement a carbon tax in 2025, the Company is utilizing Alternative Fuel and Raw Materials (AFR) and reducing the clinker factor. Furthermore, the Company is planning to construct a Solar Power Plant (PLTS) as an environmentally friendly energy efficiency effort. The construction is currently in progress, with the Company requesting permits and engineering support.

Berdasarkan komposisi-komposisi yang telah diuraikan di atas, terlihat bahwa Perusahaan memiliki struktur modal yang cukup baik, di mana ekuitas Perusahaan memiliki nilai yang lebih besar dibanding liabilitas jangka pendek dan liabilitas jangka panjang Perusahaan.

Based on the compositions described above, it appears that the Company has a fairly good capital structure, where the Company's equity has a greater value than the Company's Current liabilities and Non-current liabilities.

### DASAR PEMILIHAN KEBIJAKAN MANAJEMEN ATAS STRUKTUR MODAL

Kebijakan manajemen terhadap struktur modal diterapkan guna melindungi kemampuan Perusahaan dalam mempertahankan kelangsungan usaha, sehingga dapat memberikan imbal hasil dan manfaat bagi pemegang saham dan pemangku kepentingan lainnya. Selain itu, Perusahaan juga senantiasa mempertahankan struktur permodalan yang optimal untuk mengurangi biaya modal.

### KEBIJAKAN MANAJEMEN ATAS STRUKTUR MODAL

Perusahaan dan kelompok usahanya, dapat menyesuaikan jumlah dividen yang dibayar kepada pemegang saham, menerbitkan saham baru atau menjual aset untuk mengurangi liabilitas, hal ini bertujuan untuk mempertahankan atau menyesuaikan struktur permodalannya.

### BASIS FOR SELECTION OF MANAGEMENT POLICY ON CAPITAL STRUCTURE

The Company implements management policies to safeguard its business continuity and deliver returns and benefits to its shareholders and other stakeholders. These policies are designed to maintain an optimal capital structure that minimizes capital costs.

### MANAGEMENT POLICY ON CAPITAL STRUCTURE

Companies and their business groups can adjust the amount of dividends paid to shareholders, issue new shares, or sell assets to reduce liabilities. This is done to maintain or adjust their capital structure.

Perusahaan disyaratkan untuk memelihara tingkat permodalan tertentu oleh perjanjian pinjaman. Persyaratan tersebut telah dipenuhi oleh Perusahaan pada tanggal 31 Desember 2022 dan 2021, serta berpedoman pada Undang-Undang No. 40 Tahun 2007 tentang Perusahaan Terbatas yang efektif sejak tanggal 16 Agustus 2007, untuk mengalokasikan setidaknya 20% dari modal saham diterbitkan dan dibayar penuh ke dalam dana cadangan yang tidak boleh didistribusikan. Persyaratan permodalan eksternal tersebut telah dipertimbangkan oleh Perusahaan serta telah diputuskan pada Rapat Umum Pemegang Saham (RUPS).

Selain itu, Perusahaan mengelola dan menyesuaikan struktur permodalannya berdasarkan perubahan kondisi ekonomi. Perusahaan dapat menyesuaikan pembayaran dividen kepada Pemegang Saham, menerbitkan saham baru atau mengusahakan pendanaan melalui pinjaman. Tidak ada perubahan atas tujuan kebijakan maupun proses selama periode yang berakhir pada tanggal 31 Desember 2022 dan 2021.

Perusahaan dan kelompok usahanya, senantiasa memonitor modal berdasarkan rasio utang terhadap modal. Rasio ini dihitung dengan membagi jumlah utang dengan total modal. Sementara utang merupakan jumlah liabilitas pada laporan posisi keuangan konsolidasian. Modal terdiri dari seluruh komponen ekuitas sebagaimana jumlah dalam posisi keuangan konsolidasian.

Struktur modal merupakan pertimbangan antara penggunaan modal sendiri dengan pinjaman/utang yang terdiri dari utang jangka pendek dan utang jangka panjang. Struktur modal dengan minimum biaya penggunaan dana *Weighted Average Cost of Capital* (WACC) yang mengakibatkan peningkatan nilai saham Perusahaan, tetapi tidak berarti meningkatkan laba bersih per saham (*earning per share*/EPS). *Leverage* yang besar dapat meningkatkan EPS, namun sekaligus meningkatkan risiko. Oleh karena itu, Perusahaan menetapkan kebijakan struktur permodalan yang optimal agar dapat memaksimalkan nilai Perusahaan.

Perusahaan mengawasi modal dengan membagi total pinjaman berdampak bunga dengan total ekuitas yang dapat diatribusikan kepada pemilik entitas induk melalui rasio pengungkit (*gearing ratio*). Kebijakan Perusahaan adalah menjaga rasio pengungkit dalam kisaran dari perusahaan terkemuka di Indonesia untuk mengamankan akses terhadap pendanaan pada biaya yang rasional. Termasuk dalam total pinjaman berdampak bunga adalah pinjaman bank jangka pendek, pinjaman bank jangka panjang, pinjaman kepada Pemerintah Republik Indonesia, dan liabilitas sewa pembiayaan.

The company is obligated to maintain a specific level of capital as required by the loan agreement. These requirements have been fulfilled by the company on December 31, 2022, and 2021, following the provisions of Law No. 40 of 2007 regarding Limited Liability Companies, which has been effective since August 16, 2007. The law stipulates that at least 20% of issued and fully paid-up share capital should be allocated to a reserve fund that cannot be distributed. The Company has taken into account the external capital requirements and has made decisions at the General Meeting of Shareholders (GMS).

Furthermore, the Company manages and adjusts its capital structure in response to changes in economic conditions. This can be achieved by adjusting dividend payments to shareholders, issuing new shares, or seeking funding through loans. It's worth noting that there were no changes to the policy objectives or processes during the period ended on December 31, 2022 and 2021.

The Company and its business groups continuously monitor their capital structure based on the debt-to-capital ratio. This ratio is calculated by dividing the amount of debt by the total capital. Payables, on the other hand, represent the total liabilities in the consolidated statement of financial position. Capital includes all components of equity as presented in the consolidated financial position.

The capital structure represents a balance between the use of equity and loans/debt, which includes short-term and long-term debt. The objective is to achieve a capital structure with the minimum cost of using *Weighted Average Cost of Capital* (WACC), resulting in an increase in the value of the Company's shares. It's important to note that an increase in the value of the Company's shares does not necessarily translate to an increase in earnings per share (EPS). A high leverage can lead to an increase in EPS, but it also increases the risk. Therefore, the Company aims to determine an optimal capital structure policy that maximizes the value of the Company while considering the trade-off between the cost of capital and risk.

The Company tracks its capital structure using the gearing ratio, which is calculated by dividing total interest-bearing loans by total equity attributable to owners of the parent entity. The Company's policy is to maintain gearing ratios within the range of leading companies in Indonesia to ensure access to funding at a reasonable cost. Total interest-bearing loans include short-term bank loans, long-term bank loans, loans to the Government of the Republic of Indonesia, and finance lease liabilities.

# PROSPEK USAHA

## BUSINESS PROSPECT

Perekonomian global masih mengalami sejumlah guncangan sepanjang tahun 2022, berakibat pada tertahannya pertumbuhan ekonomi dan tekanan inflasi yang lebih tinggi dari tahun-tahun sebelumnya. Di sisi lain, stabilitas ekonomi nasional mengalami tekanan namun masih terkendali. Inflasi pada Desember 2022 tercatat 0,66% *month to month* (mtm). Sehingga, Inflasi pada tahun 2022 menjadi 5,51% *year on year* (yoy), meningkat dibandingkan dengan inflasi 2021 sebesar 1,87% *year on year* (yoy). Kinerja positif tercermin melalui *Purchasing Manager's Index* (PMI) Manufaktur atau indeks manufaktur nasional pada Desember 2022 yang ditutup pada tingkat 50,9 atau berhasil naik 0,6 poin dibandingkan perolehan bulan sebelumnya yang menyentuh di angka 50,3. Produksi manufaktur Indonesia mengalami ekspansi pada kisaran lebih cepat pada bulan Desember 2022, didorong oleh kenaikan permintaan atas barang-barang produksi Indonesia.

Di tengah perlambatan ekonomi global tersebut, hingga akhir tahun, Badan Pusat Statistik (BPS) mencatat pertumbuhan ekonomi Indonesia tetap tumbuh mengesankan mencapai 5,31%. Kinerja pertumbuhan ekonomi dipengaruhi oleh faktor global dan domestik. Secara global, Indonesia diuntungkan dengan relatif tingginya harga komoditas ekspor unggulan di pasar global yang memberikan *windfall* dan mendorong kinerja ekspor serta surplus neraca perdagangan. Secara domestik, kombinasi aktivitas masyarakat yang semakin menggeliat dan bauran kebijakan fiskal dan moneter untuk menjaga daya beli mampu mendorong aktivitas ekonomi, baik dari sisi produksi maupun konsumsi.

Di sisi lain, *demand* semen nasional di tahun 2022 mengalami penurunan sebesar 3,3% dari periode yang sama tahun sebelumnya. Penurunan *demand* juga terjadi di wilayah Sumbagsel sebesar 6,8% terhadap tahun lalu. Kondisi *oversupply* yang masih berlangsung hingga saat ini serta ketatnya persaingan di industri semen nasional, khususnya wilayah Sumbagsel masih menjadi tantangan utama perusahaan.

The global economy experienced several shocks throughout 2022, resulting in the stagnation of economic growth and higher inflation pressures than in previous years. On the other hand, the national economic stability was under pressure but still manageable. Inflation in December 2022 was recorded at 0.66% month-to-month (mtm). As a result, inflation in 2022 was 5.51% year-on-year (yoy), an increase compared to the 2021 inflation rate of 1.87% year-on-year (yoy). The positive performance is reflected through the Purchasing Manager's Index (PMI) of Manufacturing or the national manufacturing index in December 2022, which closed at 50.9 or an increase of 0.6 points compared to the previous month's figure of 50.3. Indonesian manufacturing production expanded more rapidly in December 2022, driven by an increase in demand for Indonesian-made goods.

Despite the global economic slowdown, Indonesia's economy continued to grow impressively at 5.31% until the end of the year, according to the Central Bureau of Statistics CBS. This growth is attributed to a combination of global and domestic factors. Globally, Indonesia has benefited from the high prices of leading export commodities, resulting in an increase in export performance and trade balance surplus. Domestically, a mix of fiscal and monetary policies, along with vibrant community activities, has helped to maintain purchasing power and boost economic activity in terms of production and consumption.

However, the national cement demand in 2022 has decreased by 3.3% compared to the same period in the previous year, with a significant decrease of 6.8% observed in the Sumbagsel region. This decline in demand is mainly attributed to oversupply conditions and intense competition in the national cement industry, particularly in the South Sumatra region. These factors continue to pose significant challenges for the Company.

Turunnya *demand* semen tahun 2022, khususnya *demand* pulau Sumatra sebesar 5,72% (yoy) tidak menghambat kinerja Perusahaan di mana hingga akhir tahun 2022 tetap menunjukkan pertumbuhan positif, di mana penjualan semen mencapai angka 2 Juta ton atau tumbuh 4% terhadap periode yang sama tahun sebelumnya.

Dengan mempertimbangkan kondisi perekonomian nasional yang diprediksi akan terus membaik di tengah perlambatan ekonomi global serta berbagai proyek pembangunan infrastruktur terutama dalam mendukung konektivitas antar wilayah dan infrastruktur Ibu Kota Negara Baru (IKN) yang diharapkan dapat menggenjot konsumsi semen di tingkat nasional, maka Perusahaan menetapkan sasaran penjualan sebesar 2,4 juta ton pada tahun 2023, dengan target *market share* wilayah Sumbagsel sebesar 37%. Didukung pula dengan bergabungnya Perusahaan ke dalam Semen Indonesia Group (SIG) yang diharapkan dapat membuka peluang penguasaan pasar yang lebih besar bagi Perusahaan khususnya di wilayah Sumatra Bagian Selatan.

The Company's positive growth in 2022 was achieved despite the decline in cement demand, especially on the island of Sumatra by 5.72% (yoy). The Company's cement sales continued to show positive growth until the end of 2022, reaching 2 million tons or a 4% increase compared to the same period in the previous year.

Given the predicted improvement in national economic conditions amidst the global economic slowdown and the ongoing infrastructure development projects that support inter-regional connectivity and infrastructure for the New State Capital (IKN), which are expected to increase cement consumption at the national level, the Company has set a sales target of 2.4 million tonnes for 2023, with a target market share of 37% in the Sumbagsel region. Additionally, the Company's inclusion into the Semen Indonesia Group (SIG) is expected to create opportunities for greater market control, particularly in the Southern Sumatra region.

Nonetheless, the company managed to increase sales by 4%, which resulted in an increase in market share from 2.9% to 3.2% nationally. The explanation for each province's market share is as follows:

1. The Company's market share in South Sumatra has decreased by a total of 4% from the previous year. Meanwhile, the market share for the retail segment is maintained at 54%, the same as last year.
2. The Company's market share in the Lampung region experienced significant growth, increasing by 8% from the previous year to reach 37% in 2022. The growth in market share was supported by an 8% growth in the retail segment and a 13% growth in the bulk segment.
3. The Company's market share in the Jambi region has grown by 3% to reach 14% in 2022 compared to last year, mainly due to a significant growth in the bulk segment market share of 20%.

# INFORMASI KELANGSUNGAN USAHA

## BUSINESS CONTINUITY INFORMATION

### HAL-HAL YANG BERPOTENSI BERPENGARUH SIGNIFIKAN TERHADAP KELANGSUNGAN USAHA

Kelangsungan usaha perusahaan dapat dipengaruhi oleh kondisi Eksternal dan Kondisi Internal Perusahaan. Tidak semua variabel dapat dikontrol, walaupun dapat dimitigasi. Rincian faktor-faktor yang berpengaruh terhadap kelangsungan usaha Semen Baturaja diuraikan sebagai berikut:

1. Kondisi *oversupply* kapasitas terpasang industri semen diprediksi masih terjadi di tahun 2023 di mana total kapasitas terpasang sebesar 116 juta ton. Sementara serapan konsumsi semen hanya berkisar 75,57 juta ton.
2. Kenaikan harga BBM Industri dan rencana penerapan kebijakan Zero ODOL pada awal tahun 2023 merupakan tantangan bagi Perusahaan. Namun, Perusahaan tetap berupaya mematuhi semua regulasi dan terus mencari alternatif sistem distribusi dan moda transportasi yang paling efisien.
3. Tren kenaikan harga batubara mengikuti Harga Batubara Acuan (HBA) yang berdampak pada tingginya biaya produksi. Perusahaan terbantu dengan adanya Keputusan Menteri ESDM RI No. 58.K/HK.02/MEM.B/2022 tentang Harga Jual batubara Untuk Pemenuhan Kebutuhan Bahan Baku/Bahan Bakar Industri di Dalam Negeri yang menetapkan *Domestic Market Obligation* (DMO) sebesar \$90 per ton dan berlaku mulai 01 April 2022.
4. Sebagai langkah antisipasi rencana pemerintah dalam menerapkan pajak karbon di tahun 2025, Perusahaan menggunakan bahan bakar alternatif dan material substitusi serta menurunkan faktor terak.
5. Arahan Presiden yang tertuang dalam Instruksi Presiden No. 2 Tahun 2022 tentang Percepatan Peningkatan Penggunaan Produk Dalam Negeri dan Produk Usaha Mikro, Usaha Kecil, dan Koperasi Dalam Rangka Menyukseskan Gerakan Nasional Bangga Buatan Indonesia pada Pelaksanaan Pengadaan Barang/Jasa Pemerintah.

Kondisi internal juga memiliki kontribusi dalam kelangsungan usaha Perusahaan, antara lain mencakup:

1. Keterbatasan cadangan batu kapur eksisting.
2. Kinerja Perusahaan pada tahun 2022 menunjukkan pertumbuhan yang baik berbanding tahun 2021.
3. Tambang II Pelawi yang masih terkendala pembebasan lahan sehingga hasil produksi masih belum optimal.

### ISSUES WITH POTENTIAL SIGNIFICANT IMPACT ON THE COMPANY'S BUSINESS CONTINUITY

The Company's business continuity is subject to both external and internal conditions that may affect its operations. While not all variables can be controlled, the Company endeavors to mitigate their impact. Below are the factors that have affected the business continuity of Semen Baturaja in 2022:

1. The cement industry is facing an oversupply of installed capacity, with total installed capacity at 116 million tons and cement consumption around 75.57 million tons. This condition is predicted to continue in 2023.
2. The Company is challenged by the increase in industrial fuel prices and the implementation of the Zero ODOL policy in early 2023. Despite these challenges, the Company complies with all regulations and seeks alternative distribution systems and transportation modes to optimize efficiency.
3. The trend of rising coal prices, following the Coal Reference Price (HBA), has led to high production costs. The Company is assisted by the Decree of the Minister of Energy and Mineral Resources of the Republic of Indonesia No. 58.K/HK.02/MEM.B/2022, which stipulates a Domestic Market Obligation (DMO) of \$90 per ton and became effective on April 01, 2022.
4. The Company anticipates the government's plan to implement a carbon tax in 2025 by using alternative fuels and substitute materials, as well as reducing the clinker factor.
5. The Presidential Instruction No. 2 of 2022, concerning Accelerating the Increase in the Use of Domestic Products and Products of Micro, Small Enterprises, and Cooperatives in the Context of Succeeding the Proud Made in Indonesia National Movement in the Implementation of Government Procurement of Goods/ Services, has implications for the Company's business operations.

Internal conditions also contribute to the continuity of the Company's business, including among others:

1. Limited existing limestone reserves.
2. The Company's performance in 2022 shows good growth compared to 2021.
3. Mine II Pelawi which is still constrained by land acquisition so that production results are still not optimal.
